**NATIONAL BESTSELLER** • “ It takes a rare individual not only to see that history can live, but also to make it live for others. James Thom has that gift. ” —The Indianapolis News Mary Ingles was twenty-three, happily married, and pregnant with her third child when Shawnee Indians invaded her peaceful Virginia settlement in 1755 and kidnapped her, leaving behind a bloody massacre. For months they held her captive. But nothing could imprison her spirit. With the rushing Ohio River as her guide, Mary Ingles walked one thousand miles through an untamed wilderness no white woman had ever seen. Her story lives on—extraordinary testimony to the indomitable strength of one pioneer woman who risked her life to return to her own people.

The Sample Preparation Techniques for Environmental, Plant, and Animal Samples handbook is a collection of best practices, recipes and theoretical information aimed at anyone who works with any type of molecular biology, proteomics, or metabolomics research involving difficult and tough-to-process samples, and thus is exposed to the seemingly unbreakable bottleneck of sample preparation. This book is most useful to researchers preparing nucleic acids and proteins from environmental (e.g., soil, marine, and wastewater, feces) and tough microbiological (e.g., spores, yeasts, gram positive bacteria) samples, as well as solid tissue samples from plants and animals. This book is the first comprehensive piece of literature dealing with applications of bead beating technology and other types of mechanical homogenization sample preparation.

The book reflects on the issues concerning, on the one hand, the difficulty in feeding an ever-increasing world population and, on the other hand, the need to build new productive systems able to protect the planet from overexploitation. The concept of “ food diversity ” is a synthesis of diversities: biodiversity of ecological sources of food supply; socio-territorial diversity; and cultural diversity of food traditions. In keeping with this transdisciplinary perspective, the book collects a large number of contributions that examine, firstly the relationships between agrobiodiversity, rural sustainable systems and food diversity; and secondly, the issues concerning typicality (food specialties/food identities), rural development and territorial communities. Lastly, it explores legal questions concerning the regulations aiming to protect both the food diversity and the right to food, in the light of the political, economic and social implications related to the problem of feeding the world population, while at the same time respecting local communities’ rights, especially in the developing countries. The book collects the works of legal scholars, agroecologists, historians and sociologists from around the globe.

Combining academic and industrial viewpoints, this is the definitive stand-alone resource for researchers, students and industrialists. Victor Herbert is one of the giants of American culture. As a musician, conductor, and, above all, composer, he touched every corner of American musical life at the turn of the century, writing scores of songs, marches, concerti, and other works. But his most enduring legacy is on a different kind of stage, as one of the grandfathers of the modern musical theater. Now, Victor Herbert has the biography he deserves. Neil Gould draws on his own experience as a director, producer, and scholar to craft the first comprehensive portrait in fifty years of the Irish immigrant whose extraordinary talents defined the sounds of a generation and made contemporary American music possible. Mining a wealth of sources—many for the first time—Gould provides a fascinating portrait of Herbert and his world. Born in Dublin in 1859, Herbert arrived in the United States in 1886. From his first job in the orchestra pit of the Metropolitan Opera, Herbert went on to perform in countless festivals and concerts, and conduct the Pittsburgh Orchestra. In 1894, he composed his first operetta, *Prince Ananias*, and by the time of his death in 1924, he’d composed forty-two more—many of them, such as *Naughty Marietta*, spectacular Broadway hits. Along the way, he also wrote two operas, stage music for the *Ziegfeld Follies*, and the first full score for a motion picture, *The Fall of a Nation*. Gould brilliantly blends the musical and the theatrical, classical and popular, the public and the private, in this book. He not only gives a revealing portrait of Herbert the artist, entrepreneur, and visionary, but also recreates the vibrant world of the Herbert’s Broadway. Gould takes us inside the music itself—with detailed guides to each major work and recreations of great performances. He also makes strong connections between Herbert’s breakthrough compositions, such as the operetta *Mlle. Modiste*, and the later contributions of Rudolf Friml, Sigmund Romberg, Jerome Kern and other giants of the musical theater. As exuberant as Herbert himself, this book is also a chronicle of American popular culture during one of its most creative periods. For anyone enraptured by the sound of the American musical, this book is delightfully required reading.
