why? How do you differentiate between a flaw in the performance portrayal of a character to a structural flaw in the musical itself? How do you analyse musical theatre songs that are so subjective in its very nature? Is there even a common link of analysis between musicals from the Golden Age and musicals from the present day? Musical Theatre Script and Song Analysis Through the Ages answers these questions and gives students of musical theatre the tools they need to understand and articulate how musicals work. At the heart of any musical lie its music and lyrics, yet it is this area that is least understood. This book offers a brand new terminology of analysis that gets to the core of what holds a musical together: the libretto, music, and lyrics. Through identifying methods of lyric and musical analysis and applying these to ten different musicals throughout history, students are able to ask questions such as: why

does this song sound this way?; what is this lyric doing to identify character purpose?; and how is a character communicating this feeling to an audience? From classroom analysis through to practical application, this text guides readers through a structured approach to understanding, disseminating and more importantly, articulating how a musical works. A perfect tool for students of musical theatre, its practical benefits of understanding the form, and realizing that it can be applied to any age musical, will benefit any theatre person in helping articulate all of those abstract feelings that are inherent in this art form. It offers a roadmap to the musical's innermost DNA.

The National Library of Greece (Ethnike Bibliothike tes Ellados) is one of the richest depositories of Byzantine musical manuscripts and is surpassed by its holdings in Greece only by the multitude of manuscripts found in the monasteries of Mount Athos. In spite of being such a rich archive, the National Library has never published a catalogue of its musical manuscripts - not all of which are Byzantine or Greek. It is the purpose of this catalogue to recover or, in some instances, to present for the first time the repertory of the musical sources of the library. This project has been twelve years in the making for Professor Diane Touliatos, involving the discovery and detailed cataloguing of all 241 Western, Ancient Greek, and Byzantine music manuscripts. Not all of these are from Athens or modern Greece, but also encompass Turkey, the Balkans, Italy, Cyprus, and parts of Western Europe. This variety underlines the

importance of the catalogue for identifying composers, music and performance practice of different locales. The catalogue includes a detailed listing of the contents as written in the original language as well as the titles of compositions (and/or incipits) with composers, modal signatures, other attributions and information on performance practice. Each manuscript entry includes a commentary in English indicating important highlights and its significance. There is a substantive English checklist that summarizes the contents of each manuscript for non-Greek readers. A bibliography follows containing pertinent citations where the manuscript has been used in references. There is also a glossary that defines terms for the non-specialist. Examples of some of the manuscripts will be photographically displayed. The catalogue will enlighten musicologists and Byzantinists of the rich and varied
