\*As I was seated in remembrance and contemplation one night, in front of me appeared a great stag, shining and shimmering in whiteness, and there was a concentration of brilliant white light above its head. The stag was some feet away and was moving toward me. As it got closer, I could see that the white light on its head was emanating from a flaming brand, a torch, lit, glowing with brilliant white star-like light. The flaming brand, 'qabas' in Quranic Arabic, was as if a projection from the top of its head. The stag came straight toward me, approached me until it was so near I could have reached out and touched it, and then the flaming brand that was on its head, was suddenly but so naturally, held by it in its mouth. The stag bowed its head and placed this flaming brand, this qabas at my feet, and disappeared. As this happened the following verse flashed through my mind, and I knew I had been given permission to spread the teachings that are coming to me, and I was given the name under which to do so. It is 'Qabas', a flaming brand; a torch for warmth and a light for guidance.  
Quran: surah 20, ayah 10When he saw a fire he said to his family, "hurry here, I have indeed perceived a fire maybe I can bring you from it a flaming brand or I can find guidance at the fire"QABAS - Volume 2, EnteringThis is volume 2 in the series. Containing 64 poems, many didactic, that mark the beginning stage of the 'suluk' (spiritual way) of the author. It follows Volume 1, 'Early Signs', and is followed by Volume 3, 'Exiting', and by Volume 4, 'Returned'. As in other volumes, the number of pieces in this work - 64 - bears resonance with the natural world.

At the time of Mark Rothko's apparent suicide in 1970, the deeply troubled, pioneering artist of Abstract Expressionism was at the height of fame and financial success; yet within months of the funeral, his three trusted friends, acting as executors, relinquished his entire legacy of 800 paintings to the powerful, international Marlborough Galleries (run by Frank Lloyd) for a fraction of their real worth on terms suspiciously unfavorable to the estate. The suit that Rothko's daughter brought against the executors and Marlborough rocked the art world with its shocking revelations of corruption in the international art trade: from the deceptions practiced on Rothko when he was alive to the scandals after his death involving conspiracies and cover-ups, double dealings and betrayals, missing paintings and manipulated markets, phony sales and laundered profits, forgery and fraud.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don 't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Since the beginning of mankind on Earth, if the "busyness" process was successful, then some form of benefit sustained it. The fundamentals are obvious: get the right inputs (materials, labor, money, and ideas); transform them into highly demanded, quality outputs; and make it available in time to the end consumer. Illustrating how operations relate to the rest of the organization, Production and Operations Management Systems provides an understanding of the production and operations management (P/OM) functions as well as the processes of goods and service producers. The modular character of the text permits many different journeys through the materials. If you like to start with supply chain management (Chapter 9) and then move on to inventory management (Chapter 5) and then quality management (Chapter 8), you can do so in that order. However, if your focus is product line stability and quick response time to competition, you may prefer to begin with project management (Chapter 7) to reflect the continuous project mode required for fast redesign rapid response. Slides, lectures, Excel worksheets, and solutions to short and extended problem sets are available on the Downloads / Updates tabs. The project management component of P/OM is no longer an auxiliary aspect of the field. The entire system has to be viewed and understood. The book helps students develop a sense of managerial competence in making decisions in the design, planning, operation, and control of manufacturing, production, and operations systems through examples and case studies. The text uses analytical techniques when necessary to develop critical thinking and to sharpen decision-making skills. It makes production and operations management (P/OM) interesting, even exciting, to those who are embarking on a career that involves business of any kind.

Shadow is everything in us we can't see\u2014everything we are not conscious of. Our Shadow self monitors hundreds of thousands of inputs from the world and our body/mind systems, processes the information, and constantly sends constructive and destructive messages into our conscious awareness in the forms of sensations, feelings, impulses, stories, and thoughts. This Shadow material is generated in less than a tenth of a second, and our conscious selves become more or less aware of it after one or two seconds, leaving our conscious awareness always one step behind the non-conscious flood of Shadow material. Personal development is largely growth of our Shadow selves\u2014our adaptive unconscious in which resides our deepest senses of self, morality, intimacy, vulnerability, and spirituality. Shadow Light offers a wealth of research, ideas, and practices to help us grow our Shadow selves and accelerate personal evolution.
