Named one of the best books of the year by NPR, Fortune, Bloomberg, Sunday Times A New York Times Book Review Editor's Choice "If you want to understand modern-day Silicon Valley, you need to read this book." —John Carreyrou, New York Times best-selling author of Bad Blood Hailed as the definitive book on Uber and Silicon Valley, Super Pumped is an epic story of ambition and deception, obscene wealth, and bad behavior that explores how blistering technological and financial innovation culminated in one of the most catastrophic twelve-month periods in American corporate history. Backed by billions in venture capital dollars and led by a brash and ambitious founder, Uber promised to revolutionize the way we move people and goods through the world. What followed would become a corporate cautionary tale about the perils of startup culture and a vivid example of how blind worship of startup founders can go wildly wrong.

This detailed study of the housing in Greece between the late Byzantine and early modern periods treats houses `as a container of material culture, and of functional and social activity, within the context of a changing socio-economic

Immune-mediated neurological disorders present an increasing challenge to neurologists. Recent advances have identified new antibodies, new effector mechanisms and new diagnostic tests; these have greatly enhanced our understanding of disease aetiology and opened up therapeutic opportunities, but a critical understanding of this fast-developing field is not easy to find. This volume was conceived following a very successful course on neuroimmunology in Bergamo in 2000, and was written mainly by clinicians who are active in the laboratory. It will help to keep practising neurologists and neuroimmunologists abreast of the most recent developments, and to assess new information more critically. Angela Vincent and Gianvito Martino should be congratulated on master-minding this timely and practical text. July 2001 J.
