In the decade preceding World War II and into the 1950s, Harley-Davidson was the United States Military's battle bike of choice. Employed by the U.S. Army, Navy, and Marines, as well as several allied forces, it saw service in World War II arenas from Normandy to China. Loved for its toughness and versatility by the men it carried into conflict, Harley's military models are highly prized by today's motorcycle collectors and military enthusiasts. How to Restore Your Military Harley-Davidson 1932-1952 Second Edition is the ultimate reference for correctly restoring these rare and historically significant machines. Author Bruce Palmer III is one of the top experts on Harley-Davidson military motorcycles bringing years of research to this work. Through extensive research, the book details the different models, parts, finishes, equipment, and markings necessary to restore or preserve these motorcycles. More than 250 archival and detail photos cover every facet of these unique motorcycles.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
