When Pearl Winston and her sisters move to Fort Walla Walla after their father's death, she is eager to settle down on the farm they have purchased. But settling down is proving difficult because of one of the cowboys who has been hired to take care of their new flockherd. Gerald Romney has moved to Fort Walla Walla from Los Angeles because he's a man on a mission. Five years ago, his twin sister Gertrude left home because she was in love with a good- for-nothing man that he didn't approve of. Brian Walker was a conman, but Gettie couldn't see past his good looks and charming mannerisms. The last communication Gerald received from his twin mentioned that she was in Fort Walla Walla, her husband was in jail, and they were in a lot of trouble. That was about six months ago, and he's been searching for her ever since. The easiest way to get more information is by becoming a member of the community, and so he finds work on Amethyst Farm, working for the five Winston sisters. Little did he know that his search would lead him down the unexpected path of love, and that he would discover and have to deal with with a great deal more than he bargained for.

Tiziana Manoretti is an only child in her late twenties blessed with loving parents, a promising career, and a best friend who fiercely protects her. When her mother falls seriously ill and the relationship between her parents becomes suddenly strained, a carefully hidden family secret is revealed and Tiziana's seemingly idealistic world is turned upside down. After discovering she was born in a Naples orphanage and subsequently given up for adoption, Tiziana sets out for the small town of Gaeta in an attempt to find her birth parents. Meanwhile, her best friend Christopher is sending her mixed messages, causing her to wonder if there is more to their relationship than just companionship. As she becomes intertwined with a handful of interesting characters who help her uncover her past, Tiziana needs to decide whether her feelings for Christopher are deeper than she realizes. She discovers herself and others all while her family's resilience and love for one another is tested when confronted with a shocking truth. The answers lie in a box found in a closet in Italy, and Tiziana must determine if she wants to embrace the heartache and the pain from her past in order to learn forgiveness and find peace in the future.

Watch a video introduction here. Statistics Through Applications (STA) is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation, while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. New and improved! STA 2e features expanded coverage of probability, a reorganized presentation of data analysis, a new color design and much more. Please see the posted sample chapter or request a copy today to see for yourself.
