unexpected
understanding have Ben
trying his best to be
better, no matter how
challenging . . . Linda

Suspension is probably

the most misunderstood
aspect of motorcycle
performance. This book,
by America's premier
suspension specialist,
makes the art and
science of suspension
tuning accessible to
professional and
backyard motorcycle
mechanics alike. Based
on Paul Thede's wildly
popular Race Tech
Suspension Seminars,

this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. The manual gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help

you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry.

Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and
