Plant diseases play an important role on our daily lives. Most of plant diseases are visible and are caused by biotic and/or abiotic factors. Symptoms are usually the results of a morphological change,

Online Library

2012 Scion Xb

alteration or damage to plant tissue and/or cells due to an interference of the plant ' s

metabolism. All basic structures of vascular plants are subject to attack by pathogens.

The failure in accurate disease diagnosis and management may lead to huge losses in plant production and related commodities, which
