In a series of convergent empirical essays, Manufacturing Whiteness explores the striking parallels in the social construction of whiteness and gender in colonial depictions of the colonizer/colonized and in contemporary advertising. The past decade has seen a sincere, if belated, willingness among white male scholars to self-critically examine the oppressive social, cultural, and political implications of their whiteness. Building on Jacques Lacan's powerfully original social-psychoanalytic insights into the role of desire in the fetishistic constitution of the subject-in-language, Manufacturing Whiteness offers a sophisticated, yet accessible theoretical method for deconstructing ad-content which enables the reader to trace whiteness, "otherness," and other worldliness to the very constitution of latemodern/postmodern western identity.

This key text presents an accessible and diverse exploration of spirituality in mental health practice, broadening the definition of spirituality to comprise a variety of transcendent experiences. Chapters include a brief history of the tensions of spirituality in mental health practice and consider a range of emerging topics, from spirituality among the elderly and energy work (Reiki), to spirituality in addiction recovery, incarceration, and hospice work. The book offers a close examination of the limits of the medical model of care, making a case for a more spiritually sensitive practice. Rich case examples are woven throughout, and the book is paired with podcasts that can be applied across chapters, illuminating the narrative stories and building active listening and teaching skills. Suitable for students of social work and counseling at master's level, as well as practicing clinicians, Spirituality in Mental Health Practice is an essential text for widening our understanding of how spiritual frameworks can enrich mental health practice.
