This book is the resource manual on coaching and running the 63 defense. It is based on fundamental football stressing tackling, pursuit, and turnover creation. It uses a team concept that gets all eleven players involved in playing team defense. It uses pressure concepts that place a great deal of stress on the backfield and forces them into a game of reacting to your defense while playing inverted cover 2 behind the pressure front to better support run while playing sound pass coverage support. The main goal of this defense is not not allow the big play to happen since the vast majority of youth teams live and die by the sweep and the vertical pass the defense is geared to stop these two plays while still being sound on the interior. The book is simply written with very little "coach talk" yet gives you a thorough understanding of the techniques, schemes, and principles that make this defense sound and fun. "Coach Gregory's defense is one of the most aggressive yet

Identifying and Solving Common Real Game Situation Problems in the Training Environment This is a different way to look at the game, rather than highlighting what we need to do well, it shows what often goes wrong and how to fix it. These are many situations I have found happen in top level games. How many of these problems do YOU experience with your team? Many of the defensive problems as you will see can EASILY be fixed just with good 1 on 1 or unit pressing. Also defensive tactical positioning is covered; as is improvements in our attacking play. A major improvement is needed though in COMMUNICATION at youth level to help fix all errors in most cases. Contents: 1) Attacking Shape is often WAY TOO narrow 2) We lose the ball with a bad pass where we get countered quickly and caught flat 3) NOT Sliding across and changing who you mark 4) Defensive positioning to fix in defensive team shape 5) Not pressing the opponents striker all the way 6) Not pressing the ball when it is cleared out of the penalty box 7) Poor positioning in and around the 6 yard box from Crosses 8) Positioning at the back when losing the ball 9) Wide players do not recover leaving a 2 v 1 against our fullbacks 10) We defend too deep from free kicks 11) Not closing the wide player down 12) Allowing opponent midfield players to receive and turn 13) Do we drop or press up from

As the coach, (for example in baseball) you teach your players how to bat, pitch, steal bases, back up throws from the outfield, bunt, make the double play pivot, etc. That is your job - what we want to do is to help you have your players play their very best. For example, Sandy, your second baseman, is giving your shortstop fits with her tosses on double play attempts. What do you do about it and how do you do it? We can show you the best ways to help her and yourself as she grows in the game. You will use proven mental processes to teach new skills and to improve on old skills (and create great attitudes while you're at it). Dr. Pierro presents twelve basic teaching/coaching strategies in a very positive manner so that you can teach your players the skills and tactics of the game more quickly, effectively, and joyfully. These strategies; including Visualization, Focusing, Anchoring, and Triggers; are presented with many examples and illustrations from real sports settings.
