Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The 1-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

'One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?

The Economics of Alfred Marshall brings together a number of leading international scholars for a timely reappraisal of Marshall's contribution to the development of economics. The aims of the contributors are firatly to revisit the work of Alfred Marshall and to investigate the unity of his projects, which contemporary authors often tend to underestimate; and secondly to show how Marshall's approach is not only a subject for historians of economic thought, but may also provide a message that is relevant for the progress of economics.

Journeying to the Sothoi Wind Plain as a representative of the War God, Bahzell is selected to become the first hradani windrider in history, an honor that brings as much resentment as respect and a situation that is complicated by the plots of the goddess Shigu, the Queen of Hell, and her supporters and the romantic overtures of Baron Tellian's daughter.

Edmond (or Edmund) Halley, FRS (/ˈhæli/; 8 November [O.S. 29 October] 1656 – 25 January 1742 [O.S. 14 January 1741]) was an English astronomer, geophysicist, mathematician, meteorologist, and physicist. He was the second Astronomer Royal in Britain, succeeding John Flamsteed in 1720.

During the decade that preceded Mr Gorbachev's era of glasnost and perestroika, the KGB headquarters in Moscow was putting out a constant stream of instructions to its Residencies abroad. Unknown to the KGB, however, many of these highly classified documents were being secretly copied by Oleg Gordievsky, at that time not only a high-ranking KGB officer based in London but also a long-serving undercover agent for the British. The selected documents in this volume, translated and analysed by the editors with a commentary by Christopher Andrew to set them in context, offer a revealing insight into the attitudes, prejudices and fears of the KGB during what were to prove its declining years.
