1982 to 9 July 1982 are contained in the present volume. The Advanced Study Institute was attended by 37 lecturers and participants from 10 different countries. The Organizing Committee consisted of Professors P. Gtilkan, A. C. Scordelis, S. T. Wasti and 9. Yl. Imaz. The guidelines set by NATO for the Advanced Study Institute require it to serve not only as an efficient forum for the dissemination of available advanced knowledge to a selected group of qualified people but also as a platform for the exploration of future research possibilities in the scientific or engineering areas concerned. The main topics covered by the present Advanced Study Institute were the mathematical modelling of bridges for better analysis and the scientific assessment of bridge behaviour for the introduction of improved design procedures. It has been our observation that as a result of the range and depth of the lectures presented and the many informal discussions that took place,

ideas became fissile, the stimulus never flagged and many gaps in the engineering knowledge of the participants were "bridged". Here we particularly wish to mention that valuable informal presentations of research work were made during the course of the Institute by Drs. Friedrich, Karaesmen, Lamas and Parker.

This book analytically reviews the impact of the global anti-money laundering and counter-terrorist financing (AML/CFT) framework on the compliance trajectory of a number of jurisdictions to this framework. The work begins by examining the international financial sector reform and its evolution to inculcate the global framework for AML/CFT regulations. It challenges the resulting uniform AML/CFT due to its paradoxical impact on the compliance trajectory of African countries and emerging economies (ACs/EEs). This is done through

an examination of the pre-conditions for effective regulation and compliance drivers for ACs/EEs that reveals the behavioural impact of the AML/CFT standards on the bloc of countries. Through the application of agency theory, it explores the relationship between ACs/EEs on the one hand and the international financial institutions that formulate, disseminate and facilitate compliance with the global framework for AML/CFT standards on the other. The remaining chapters review empirically the compliance pressures and resulting compliance trajectory of ACs/EEs with the AML/CFT standards. The final part of the book provides a detailed explanation of the compliance challenges of ACs/EEs and the legitimacy concerns that facilitate this. This book offers a new direction on the impact of global AML/CFT standards on ACs/EEs and contributes to the understanding of the conditions under which the global standards are

undergraduates, graduate students, postdoctoral researchers, and instructors involved in structural biology or biophysics courses or in research on protein structure – function relationships." —David Sheehan, ChemBioChem, 2011 "Introduction to Proteins is an excellent, state-of-the-art choice for students, faculty, or researchers needing a monograph on protein structure. [...] this is an immensely informative, thoroughly researched, up-to-date text, with broad coverage and remarkable depth. Introduction to Proteins would provide an excellent basis for an upper-level or graduate course on protein structure, and a valuable addition to the libraries of professionals interested in this centrally important field." —Eric Martz, Biochemistry and Molecular Biology Education, 2012 Introduction to Proteins shows how proteins can be analyzed in multiple ways. It refers to the roles of proteins and enzymes in diverse contexts and everyday

journalist who mysteriously disappeared, she escaped danger the only way she knew how: She married her childhood friend, Vladimir, and moved to the United States, where he is a professional hockey player in Nashville. Vlad, aka the Russian, thought he could be content with his marriage of convenience. But it's become too difficult to continue in a one-sided relationship. He joined the Bromance Book Club to learn how to make his wife love him, but all he's learned is that he deserves more. He's ready to create his own sweeping romance--both on and off the page. The bros are unwilling to let Vlad forgo true love--and this time they're not operating solo. They join forces with Vlad's neighbors, a group of meddling widows who call themselves the Loners. But just when things finally look promising, Elena's past life intrudes and their happily ever after is cast into doubt.
