Covers all Camry, Avalon, Solara and Lexus ES300 models.

Although not quite the stout heavy-duty performer as its big brother, the Turbo 400, the Turbo 350 transmission is a fine, durable, capable, and when modified, stout performer in its own right. Millions of GM cars and trucks have been built with Turbo 350 automatic transmissions. There always comes a time when the old transmission shows signs of wear. At some point, even the best transmissions need to be rebuilt. In GM Turbo 350 Transmissions: How to Rebuild & Modify, respected automotive technical author Cliff Ruggles guides you through the complex rebuild procedure of GM's popular rear-wheel-drive automatic transmission. With his proven style, Ruggles goes through the step-by-step rebuild and performance upgrade procedures in a series of full-color photos. He includes instruction on removal and installation, tear-down procedures, parts inspection and replacement, as well as performance mods and shift kit installation. Time-saving tips are part of every buildup as well. Automatic transmissions are a mystery to most. Even if you end up deciding to have a professional take care of your transmission repair and performance needs, the information contained in this book is crucial to understanding how the power gets from the engine to the road. Add a copy of GM Turbo 350: How to Rebuild & Modify to your automotive library today.

Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

East Asia is one of the world's most dynamic and diverse regions and is also becoming an increasingly coherent region through the inter-play of various integrative economic, political and socio-cultural processes. Fully updated and revised throughout, this new edition explores the various ways in which East Asian regionalism continues to deepen. The second edition has been expanded to incorporate coverage of significant issues that have emerged in recent years including: Growing tensions in the region over maritime territory and historical issues Competing regional free trade agreement negotiations The impact of the global financial crisis on financial co-operation and engagement with global governance Obama's 'pivot to Asia' and developments in US relations with East Asia The influence of new technology and social media on micro-level regional relations The growing importance of 'new diplomacy' issues such as energy security, climate change, food security and international migration. Key pedagogical features include: end of chapter 'study questions' case studies that discuss topical issues with study questions also provided useful tables and figures which illustrate key regional trends in East Asia Extensive summary conclusions covering the chapter's main findings from different international political economy perspectives. East Asian Regionalism is an essential text for courses on East Asian regionalism, Asian politics and Asian economics.

Annotation This report examines the possibility that global demand for capital will tend to outstrip supply, thus putting upward pressure on global real interest rates. The paper discusses the demand for foreign capital in developing countries, the effect of this demand on savings in industrial countries, and net capital flows from industrial to developing countries. The analysis of trends over the next 10 to 15 years suggests that a large rise in international real interest rates is unlikely as long as fiscal consolidation in industrial countries remains on track.

This book explores Japanese investment in Europe and Southeast Asia, in relation to the automobile industry. In Part I the authors examine industrial organization and policy issues in Thailand, Malaysia, The Philippines and Indonesia, looking at Japanese investment and the relative policy successes and failures in these host countries. Part II looks at skill formation systems in the Japanese dominated automobile industry in Southeast Asia and in Part III the authors focus on the EU and the very different influence of Japanese investment.
