Christine Hippert examines buying food on credit in corner stores in Cabarete, an international tourism destination in the Dominican Republic and a hub for migrant laborers. The voices in this book highlight people's experiences with food, debt, and survival to reveal emerging social changes related to race, gender, class, and citizenship.

In this layered collage of memory within memory, Hale recreates for readers her kaleidoscopic experience of a decades-long journey to acceptance and insight. Writer, prodigal daughter, single parent, Buddhist disciple, and, late in midlife, a newlywed, she is transformed through an unconventional relationship with a female spiritual teacher and an odd ritual of repeated tattooing with her two young adult children. "Christine Hale's evocation of the bewildering complexities of life as a mother, daughter, wife (and ex-wife), and student of Buddhism is both a poem and a letter to those she has worked so long and hard to understand. On a journey that takes her through emotional and actual hurricanes, love and cruelty, urgent losses, and painful gains, she climbs to sometimes unnervingly high altitudes as she experiences "the joy and the sorrow of samsara." In beautiful, clear language, Hale explores the wounds life gives us, the wounds we give ourselves, and the long process of healing." -Sarah Stone, author of *The True Sources of the Nile* Christine Hale is the author of a novel, *Basil's Dream* (Livingston Press 2009); National Book Award finalist Joan Silber says, "Basil's Dream...seems to prove fiction can go where other forms can't." Ms. Hale's creative nonfiction has appeared in *Arts & Letters*, *Spry*, *Still*, *Hippocampus*, and *Prime Number*, among other journals. A fellow of MacDowell, Ucross, Hedgebrook, and the Virginia Center for the Creative Arts, she earned her MFA from Warren Wilson College. She teaches in the Antioch University-Los Angeles Low-Residency MFA Program as well as the Great Smokies Writing Program in Asheville, North Carolina, where she and her husband live.

Around the globe, poverty has held too many people in its grip for too long. While microfinance - small loans to impoverished individuals - initially attracted attention in the press, it didn't achieve the scale, scope, and profitability necessary to substantially combat poverty. All that changed with Vikram Akula's creation of SKS Microfinance. In this highly personal narrative, *A Fistful of Rice*, Akula reveals how he pieced together the best of both philanthropy and (to his surprise) capitalism to help millions of India's poor transition from paupers to customers to business owners. As thoughtful as Barack Obama's personal journey in *Dreams from My Father*, as harrowing as Paul Farmer's battle against infectious disease in *Mountains Beyond Mountains*, and as gripping as Greg Mortensen's fight for education in *Three Cups of Tea*, Akula's story shows how traditional business principles can be

Wheat and Rice in Disease Prevention and Health reviews the wide range of studies focusing on the health benefits and disease prevention associated with the consumption of wheat and rice, the two most widely consumed whole grains. This book provides researchers, clinicians, and students with a comprehensive, definitive, and up-to-date compendium on the diverse basic and translational aspects of whole grain consumption and its protective effects across human health and disease. It serves as both a resource for current researchers as well as a guide to assist those in related disciplines to enter the realm of whole grain and nutrition research. Overall, studies have shown that a decrease in the amount of whole grains in the modern diet is related to a corresponding increase in health problems that are attributed to this all-too-common dietary imbalance. The resulting health issues associated with an over-processed diet, which provides inadequate levels of nutrients from whole grains, may include obesity, diabetes, high blood lipids, chronic inflammatory states, and an excess of oxidative stress. Strength and endurance may also suffer as a result of these nutrient deficiencies, followed by declines in energy and immunity. Saves researchers and clinicians time in quickly accessing the latest details on a broad range of nutritional and epidemiological issues Provides a common language for nutritionists, nutrition researchers, epidemiologists, and dietitians to discuss how the action of wheat and rice protect against disease and modify human health Preclinical, clinical, and population studies help nutritionists, dieticians, and clinicians map out key areas for research and further clinical recommendations
