This first volume of a major reassessment of the last five centuries of German history deals with that age of German history which had the widest effect on the rise of modern Western civilization. Against the background of medieval culture, the author shows the origins of Luther's religion and the growth of various Protestant churches, as well as the subsequent restoration of the Roman Catholic Church.

This concluding volume of a three-volume reassessment of the last five centuries of German history develops the theme of power into what Gordon A. Craig calls a "masterly account of the dramatic, tragic and often shameful history of Germany in the most recent age" (New York Times Book Review). It deals with the period of nationalism and imperialism, from the abortive attempt of popular forces to found a liberal national state and Bismarck's German unification through the Prussian military ...

Germany - Germany - History: Germanic peoples occupied much of the present-day territory of Germany in ancient times. The Germanic peoples are those who spoke one of the Germanic languages, and they thus originated as a group with the so-called first sound shift (Grimm's law), which turned a Proto-Indo-European dialect into a new Proto-Germanic language within the Indo-European language family.

This engaging textbook provides a broad survey of modern German history from 1800-2000, and situates Germany's fragmented past within its full context. Kitchen: Provides readers a long view of German history, allowing them to see continuities and changes Covers the unification of Germany, the German Empire, the Weimar Republic, the Third Reich, the Federal Republic, the collapse of Communism, and the re-unification Examines cultural history as well as political and economic history Includes coverage of regional history rather than focusing on the dominant role of Prussia

Featuring revised and extended coverage, the second edition of A History of Modern Germany offers an accessible and engagingly written account of German history from 1800 to the present. Provides readers with a long view of modern German history, revealing its continuities and changes Features updated and extended coverage of German social change and modernization, class, religion, and gender Includes more in depth coverage of the German Democratic Republic Examines Germany's social, political, and economic history Covers the unification of Germany, the German Empire, the Weimar Republic, the Third Reich, post-war division, the collapse of Communism, and developments since re-unification Addresses regional history rather than focusing on the dominant role of Prussia

"Tipton's book will prove a godsend to teachers and students of Modern German History; not only does it provide a fresh and compelling account of the whole period from 1815 right up to the present, it achieves a rare synthesis of social, political, economic and cultural history. You get the equivalent of about six (good) books for the price of one!!"--John Milfull,

University of New South Wales "A comprehensive, balanced, up-to-date, and fair synthesis that will be extremely valuable to undergraduate students. . . The writing is superior and the approach is sound. . . This study will challenge student readers to make the sorts of connections that are demanded of them in too few of the competing texts."--James Retallack, University of Toronto

[1] The Reformation.--[2] 1648-1840.--[3] 1840-1945.

With a careful blend of concision and rich detail, Sam A. Mustafa's readable and lively text traces German history from Roman times to the present, placing particular emphasis on the past three centuries. Balanced and clearly written, the book guides readers expertly through the complex tangle of Germany's past. Mustafa provides a judicious mix of narrative history and historiography, tracing the influential individuals and broad social currents, myths and legends, and political and cultural elements that have shaped the country. In addition, the book is unique in bringing the story fully to the present with a chapter on the past twenty-five years that explores the nation's reunification and its struggles with history and memory. Generously illustrated with photos, artwork, and maps, the book also includes text boxes to allow readers to pause and consider key concepts in greater detail. Each chapter offers a list of further suggested readings, with a mixture of classic and recent scholarship, to provide a range of coverage of important issues.

Modern Germany presents a comprehensive overview and interpretation of the development of Germany in the twentieth century, a country whose history has decisively shaped the map and the politics of modern Europe and the world in which we live. Professor Berghahn is not merely concerned with politics diplomacy, but also with social change, economic performance and industrial relations. For this new edition Professor Berghahn has broadened and extended his discussion of the two Germanies. He also has updated the tables and bibliography.

Traces changes and trends from the Middle Ages to 1939 that have contributed to or confined modern Germany's political development and priorities.

Attempts to present a coherent account of early modern German history are often hampered by the German equivalent of the Whig theory of history, by which all useful roads lead up to the creation of the nineteenth-century power state (Machstaat) or institutional state (Anstalstaat). In this kind of historiography, there are large "blank" areas between the "important" events like the Reformation, the Thirty Years War, the Seven Years War, and the French Revolution. During the intervals of apparent stagnation between these events, "Germany" seems to disappear, to be replaced by states such as Prussian and Austria, Saxony, Bavaria, and the Palatinate. Substantial areas are ignored, and groups such as the parliamentary Estates, which stood in the way of state-building, are virtually written out of most accounts. Rather than focusing on the separate histories of the individual German states, Michael Hughes looks to the structure of the Holy Roman Empire in its final centuries and writes an account of Germany as a functioning, federative state, with institutions capable of reform and modernization. For nineteenth- and twentieth-century historians, the Empire was seen as the embodiment of division and weakness. But by examining the first Reich, Hughes reveals the persistence of the idea of Germanness and German national feeling during a period when, according to most accounts, Germany had virtually ceased to exist. At the same time, he examines "the element of continuity in Germany's development . . . in an attempt to discover how far back in Germany's past it is necessary to go to find the roots of the 'German problem,' the Germans' search for a political expression of their strongly developed awareness of cultural unity."
