In A Theory of Love, Helen, a British journalist, meets lawyer turned financier Christopher while she's on assignment in Bermeja. He's there for a bit of relaxation on his surfboard. Author Margaret Br Although the couple in this novel hasn't fabricated a relationship, A Theory of Love reminded me of Glimpses of a Moon, one of my favorite novels by Edith Wharton.

Passionate love is characterized by intense emotions, sexual attraction, anxiety, and affection. When these intense emotions are reciprocated, people feel elated and fulfilled.

Unreciprocated love leads to feelings of despondency and despair. Hatfield suggests that passionate love is transitory, usually lasting between 6 and 30 months. □ □

Love. This theory attempts to explain what is present in love, how love can be defined, and how feelings of love may change or evolve over time.

Ultimately, we all feel love differently, but this theory helps to narrow down the ways in which we approach and identify our love for another person.

A Theory of Love, her second book, was released in May 2018. Theory unspools the story of Christopher, a high-flying financier, and his younger, less-sophisticated wife Helen, an English journalist. As Christopher skates close to the edge of regulatory wrongdoing with his colleagues, Helen feels estranged from him and retreats into her own world of research.

This original and lucid account of the complexities of love and its essential role in human well-being draws on the latest scientific research. Three eminent psychiatrists tackle the difficult task of reconciling what artists and thinkers have known for thousands of years about the human heart with what has only recently been

In this groundbreaking work, Robert Sternberg opens the book of love and shows you how to discover your own story--and how to read your relationships in a whole new light. What draws us so strongly to some people and repels us from others? What makes some relationships work so smoothly and others burst into flames? Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love

stories we carry inside us. Drawing on extensive research and fascinating examples of real couples, Sternberg identifies 26 types of love story--including the fantasy story, the business story, the collector story, the horror story, and many others--each with its distinctive advantages and pitfalls, and many of which are clashingly incompatible. These are the largely unconscious preconceptions that guide our romantic choices, and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships. As long as we remain oblivious to the role our stories play, we are likely to repeat the same mistakes again and again. But the enlivening good news this book brings us is that though our stories drive us, we can revise them

and learn to choose partners whose stories are more compatible with our own. Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner. Are you a traveler, a gardener, a teacher, or something else entirely? *Love is a Story* shows you how to find out.

Drawing comparisons to the most eloquent science writing of our day, three eminent psychiatrists tackle the difficult task of reconciling what artists and thinkers have known for thousands of years about the human heart with what has only recently been learned about the primitive functions of the human brain. The result is an original, lucid, at times moving account of the complexities of love and its essential role in human well-being. A
