LLB Law and Accounting & Finance (MN14) is a joint honours degree scheme that covers two stimulating, challenging and complimentary disciplines. You will be taught across two departments: the Law & Criminology Department, the oldest and most established department of its kind in Wales and Aberystwyth Business School, made up of staff that have a wide range of expertise, technical skills and real-world business experience.

The need for an understanding of accounting is now even more critical than ever for lawyers practicing in many areas including securities and corporate law and litigation. In addition, over the last several years, the Financial Accounting Standards Board has made some landmark changes in the accounting rules in areas of interest to lawyers, including the accounting for mergers and acquisitions. The Second Edition of Accounting and Finance For Lawyers includes important material on such areas as accounting for stock options and derivatives and the elimination of the pooling of interests method of accounting for acquisitions. There is a discussion of the accounting implications of the use of so-called special purpose entities. Finally, a chapter on international accounting issues reflects the increasing globalization of business and accounting. As in the First Edition, the basic building blocks of accounting are covered so that the material is accessible and useful to those with any level of accounting knowledge.

This product provides a well-rounded summary of the relevant accounting areas from basic financial statements to complex earnings-per-share ratios and corporate finance and valuation. Learn how to recognize revenue, expenses, assets, and liabilities. It reviews accounting principles for many different areas, including acquisitions, investments, long-term debt, leases, stocks, and partnerships. It also discusses recent developments such as adoption of new requirements to place most operating leases on the lessee's balance sheet, a new principles based approach to accounting for revenue, and refinements in the accounting for stock options.

Accounting and Corporate Finance for Lawyers introduces law students to the fundamental concepts of accounting and corporate finance. Students learn how to read and understand financial statements and footnotes, assess a company ' s financial position, and evaluate financial provisions and covenants in contracts. This book begins preparing students for success in the practice of law by providing the critical foundation of understanding accounting concepts and principles and the language of business people. Professors and students will benefit from: A reader-friendly organization and style Discussion and examples of how the principles are applied in practice Examples and exhibits that supplement the substance Exercises and problems designed to build a student ' s knowledge base Teaching materials include: A text-based discussion of possible talking points for each of the textbook chapters. The Teacher ' s Manual chapter text includes cross-references to the corresponding page numbers of the text chapter and the corresponding slide number for the power point presentation that accompanies each chapter. A PowerPoint presentation for each textbook chapter, which includes both bullet points to guide the discussion, as well as embedded examples drawn primarily from the corresponding textbook chapter. The PPT slide headings correspond to the chapter headings and chapter structure to facilitate ease of use. A prepared solution for each of the problems set forth in the textbook with explanations where warranted. A sample syllabus of the content that might be covered in a 3 credit Accounting for Lawyers course. Sample exam questions with a corresponding grading rubric that sets forth the potential information a student should address in their answer. The sample exam questions may be used to create a midterm and final exam or just a final exam. A sample small group presentation project with corresponding grading rubric that sets forth the content areas the group will be graded on as a part of the presentation project.

The principles of accounting and finance directly extend to contract issues, torts, business and securities matters, taxation issues, partnership disputes, gift and estate matters, to name only a partial list. These areas of jurisprudence are often based significantly on substantive financial questions, and their measurement can be the heart of the entire matter. The application of broad accounting principles to countless business transactions requires an understanding of the objectives of financial reporting and the needs of the users of financial information. Contrary to popular belief, accounting is not a mathematical formula or calculation, but rather an organized system that logically summarizes business transactions into useable information that is meaningful to management, creditors, business investors and other stakeholders. This text takes readers through the system of accounting and the development of financial statements. Complexities and limitations of accounting information are explored, culminating in a study of ratio analysis of financial statements to glean relevant insights. The objective of this introductory study of accounting is to provide a broad, workable knowledge base that will facilitate the use of accounting information as it relates to the practice of law.

Most law students have never had formal coursework in accounting or finance, yet these areas are integral to so many law school courses including: Business Associations, Securities Regulations, Corporate Finance, Taxation, Banking Law, Financial Regulation, and Business Planning. With math no more difficult than high school algebra, Essential Concepts of Business for Lawyers, Third Edition fills in those gaps with an accessible and interactive presentation of accounting, finance, and financial markets. Each stand-alone chapter provides a complete lesson that will shed light on business courses in law school, as well as business situations in legal practice. New to the Third Edition: Updates for and addition of new cases that illustrate the business concepts Addition of more examples, including information related to more companies such as Google and Uber Addition of new materials on the basic microeconomic concept of supply and demand Professors and students will benefit from: A self-contained course book that supports a 2-credit course on an overview of business concepts, including accounting, finance, valuation, financial instruments, and business strategy Lessons that go beyond the definitions of terms of art and business terminology A book written at an accessible level Edited appellate cases that connect business concepts to the law and legal practice Knowledge of the basic and most essential concepts of business Materials presented in an accessible way including the use of many examples to illustrate difficult concepts Clear explanations of difficult materials and foreign concepts

Accounting and Corporate Finance for Lawyers introduces law students to the fundamental concepts of accounting and corporate finance. Students learn how to read and understand financial statements and footnotes, assess a company ' s financial position, and evaluate financial provisions and covenants in contracts. This book begins preparing students for success in the practice of law by providing the critical foundation of understanding accounting concepts and principles and the language of business people. Professors and students will benefit from: A reader-friendly organization and style Discussion and examples of how the principles are applied in practice Examples and exhibits that supplement the substance Exercises and problems designed to build a student ' s knowledge base Teaching materials include: A text-based discussion of possible talking points for each of the textbook chapters.
