The two-volume set LNAI 10245 and LNAI 10246 constitutes the refereed proceedings of the 16th International Conference on Artificial Intelligence and Soft Computing, ICAISC 2017, held in Zakopane, Poland in June 2017. The 133 revised full papers presented were carefully reviewed and selected from 274 submissions. The papers included in the first volume are organized in the following five parts: neural networks and their applications; fuzzy systems and their applications; evolutionary algorithms and their applications; computer vision, image and speech analysis; and bioinformatics, biometrics and medical applications.

Tamara Hoyland, formerly an undercover operative for government intelligence, has been a blameless wife, mother and archaeologist for nearly twenty years. Now her three sons have flown the nest, her husband is working abroad, her day job is about to fold, and death is on her mind - particularly when her father-in-law Gordon Hope passes on, and she is left to deal with the funeral arrangements. It was a natural death...wasn't it? But doubts arise when Gordon's oldest son Euan, a doctor experienced in the process of legal euthanasia, returns from America...

Want to create a solid, manufacturable PCB the first time? Well, you're in luck. Get the only book you will ever need to upgrade your PCB knowledge and launch your career to new heights. Forget the school of hard-knocks and learn all the things industry experts wish they knew when starting out. With over 100 pages of content including checklists, pro-tips, and detailed illustrations, you'll gain decades of wisdom in a fraction of the time. Read the Hitchhikers Guide to PCB Design to be entertained and learn - How to create a robust and manufacturable PCB layout beyond routing the rats - Why it's important to incorporate DFX (Design for Excellence) and the many topics it covers - Who your project stakeholders are and why their involvement is essential for design success - PCB Design best practices you need to know and more BONUS- You can get a FREE digital download of the guide by visiting the EMA Design Automation website.

Dieses Notizbuch ist das perfekte Geschenk für alle die heißen Kaffee lieben.Cappuccino und Espresso ist nun mal warm am besten.Inhalt: 110 Seiten LiniertPerfekt für Notizen, Skizzen, Malereien und als Tagebuch!

This book covers a variety of topics related to the Industry 4.0 concept, with a special emphasis on the efficiency of production processes and innovative solutions for smart factories. It describes tools supporting this concept in both the mechanical engineering and biomedical engineering field. The content is based on papers presented at the 6th International Scientific-Technical Conference MANUFACTURING 2019, held on 19-22 May 2019, in Poznan, Poland. Virtual reality, simulation of manufacturing systems, additive manufacturing, big data analysis, automation and application of artificial intelligence, as well as economic and social issues related to the integration of those technologies are just some of the topics discussed here. All in all, the book offers a timely and practice-oriented reference guide for researchers and practitioners, and is expected to foster better communication and closer cooperation between universities and their business and industrial partners.

Over the past hundred years, gulls have been brought ashore by modernity. They now live not only on the coasts but in our slipstream following trawlers, barges, and garbage trucks. They are more our contemporaries than most birds, living their wild lives among us in towns and cities. In many ways they live as we do, walking the built-up world and grabbing a bite where they can. Yet this disturbs us. We've started fearing gulls for getting good at being among us. We see them as scavengers, not entrepreneurs; ocean-going aliens, not refugees. They are too big for the world they have entered. Their

story is our story too. Landfill is the original and compelling story of how in the Anthropocene we have learned about the natural world, named and catalogued it, and then colonized it, planted it, or filled it with our junk. While most other birds have gone in the opposite direction, hiding away from us, some vanishing forever, gulls continue to tell us how the wild can share our world. For these reasons Landfill is the nature book for our times, groundbreaking and genre-bending. Without nostalgia or eulogy, it kicks beneath the littered surface of the things to discover stranger truths.

Two gods. A world divided. One man and one woman destined to decide which god will control humanity's destiny for the next 1,000 years. For Mirah, who has a mind of her own and a will far outweighing her slight stature, her late father's general supply shop was the world. Then came a simple knock on the door one cold, winter night following an exhausting day. Her only goal being to dismiss whoever it was so she could get to bed, she answered it. Unfortunately, the two Knights on the other side had orders that would ultimately shatter her world. In the blink of an eye, she's ripped from the only life she's known and riding headlong into a destiny for which she was not prepared. A destiny she shares with a man named Rasmun who seems bent on killing her. Through dark forests, scorching deserts, snow covered mountains, and cursed land, she and her Knight Protectors; the arrogant Commander Roenin, patient Colonel Alyen, and fiery, red-headed Captain Samone; first learn about then struggle to fulfill the demands of a secret held by the Temple for the last one thousand years. A secret that will not only change Mirah's life forever, but the world as well.

For undergraduate and graduate courses in global marketing The excitement, challenges, and controversies of global marketing. Global Marketing reflects current issues and events while offering conceptual and analytical tools that will help students apply the 4Ps to global marketing. MyMarketingLab for Global Marketing is a total learning package. MyMarketingLab is an online homework, tutorial, and assessment program that truly engages students in learning. It helps students better prepare for class, quizzes, and exams—resulting in better performance in the course—and provides educators a dynamic set of tools for gauging individual and class progress.
