What if UFO secrecy ended tomorrow? The transition from B.C. (Before Confirmation) to A.D. (After Disclosure) is the ultimate " what if? " scenario in which the calendar is reset and history begins again. This work of speculative non-fiction combines meticulous fact-finding from historian/ researcher Richard M. Dolan and forward-leaning scenarios from journalist/screenwriter Bryce Zabel on the world ' s most mind-bending subject. The authors predict radical changes after official acknowledgment that at least some UFOs are intelligently controlled craft from somewhere other than Earth. A.D. After Disclosure isn ' t afraid to make mind-blowing, specific predictions, such as: Congress will hold Watergate-style hearings and ask secret-keepers, " What did you know and when did you know it? " The first decade A.D. (After Disclosure) will be like a high-tech 1960s, spawning massive cultural and societal change. Abductees will file a class-action suit against the government for withholding critical information. All the textbooks on planet Earth—from history to science—will need an immediate review. Whether disclosure leads to social panic or ushers in a new era of unity and peace, it will undoubtedly be a game-changing event.

For as long as people have talked about UFOs, they have wondered about when and how the governments of the world will acknowledge them. Among people following the subject, that's called Disclosure. In this second volume of the Richard Dolan Lecture Series, Historian Richard Dolan tackles an enormous subject. After explaining why UFOs are taken seriously in national security circles around the world, he provides his best analysis to date as to how the secrecy on UFOs has taken form, how it has corroded our society, and how it works internationally. He gives a fresh analysis on the black budget breakaway civilization, on the weaponization of secret technologies, the intelligences behind the UFO phenomenon, and how Russia and China fit into the global UFO cover-up. He drives his analysis home with four distinct disclosure scenarios: Fascist Disclosure, Premature Disclosure, Insider Disclosure, and People-Driven Disclosure. Finally, Dolan offers a unique view on how the UFO cover-up and possible disclosure could transpire during the presidency of Donald Trump. One thing is clear: we live in a world that hangs in the balance.

While HIV/AIDS is a global public heath challenge, its impact is arguably greatest in the Sub-Saharan Africa (SSA), where new infections account for approximately 66% of the total number of HIV-positive persons globally. In SSA, medical, social, and economic resources are limited, thus necessitating innovative approaches to disease prevention. One of the mechanisms of prevention that is most promising occurs through HIV disclosure to family members (e.g., adult sexual partners) generally, and to children in particular. Our emphasis in this eBook is on HIV disclosure to children because it has multiple benefits, including improved adherence to antiretroviral medication treatment and understanding at an early age of the impact of sexual activity on the spread of HIV. While there is a noticeable gap in research on HIV disclosure to younger children, some of the general reasons for non-disclosure include concerns about fear of adult partners leaving relationships, and that children are too young to comprehend the severity of the situation and may tell others outside the family. Thus, it is critical to better understand how the HIV disclosure process happens (or does not happen) within HIV-affected families, as well as the best practices on how to disclose. In this eBook, we present a combination of empirical research studies and critical literature reviews that investigate the reasons for and for not disclosing HIV status within HIV-affected families and provide evidence-based practices that could be adopted by healthcare professionals to help HIV-positive parents facilitate disclosure activities within these families. This information can also be used by researchers, practitioners, and stakeholders who are in a position to influence policies on effective HIV disclosure practices, guidelines, and programs.

Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

This latest edition of NY CLS Desk Edition: Gilbert's Criminal Practice Annual is an indispensable one-volume publication featuring the complete New York Criminal Procedure Law, Penal Law, and Correction Law, together with relevant provisions of the Civil Practice Law and Rules, Executive Law, Family Court Act, Judiciary Law, Public Health Law, Vehicle and Traffic Law, and Court Rules. Barry Kamins, designed to assist the practitioner in understanding the sentencing statutes contained in the Penal Law and Criminal Procedure Law. • New York Court Structure Chart and Court Directory. • Detailed Index.

This paper presents an assessment of the level of observance of the IOSCO Objectives and Principles of Securities Regulation in China. The regulatory framework and supervisory program for the securities markets is largely compliant with the IOSCO Principles. Since 2010, the authorities have implemented several initiatives aimed at protecting China ' s very large retail investor population. On the China Securities Regulatory Commission (CSRC) side, this includes strengthening the suitability requirements for intermediaries, investors ' ability to exercise their rights, and its investor education program. The CSRC has also expanded authorized activities for some categories of securities intermediaries with the objective of developing an investment banking culture to help capital markets serve the real economy better.

This volume integrates scholarly work on disclosure and uncertainty with the most up-to-date, cutting edge research, theories, and applications. Uncertainty is an ever-present part of human relationships, and the ways in which people reduce and/or manage uncertainty involves regulating their communication with others through revealing and concealing information. This collection is devoted to collating knowledge in these areas, advancing theory and presenting work that is socially meaningful. This work includes contributions from renowned scholars in interpersonal uncertainty and information regulation, focusing on processes that bridge boundaries within and across disciplines, while maintaining emphasis on interpersonal contexts. Disciplines represented here include interpersonal, family, and health communication, as well as relational and social psychology. Key features of the volume include: comprehensive coverage integrating the latest research on disclosure, information seeking, and uncertainty a highly theoretical content, socially meaningful in nature (applied to real-world contexts) an interdisciplinary approach that crosses sub-fields within communication. This volume is a unique and timely resource for advanced study in interpersonal, health, or family communication. With its emphasis on theory, the book is an excellent resource for graduate courses addressing theory and/or theory construction, and it will also appeal to scholars interested in applied research.
