Despite a severe economic crisis, social unrest and growing pressure for political change in Indonesia, President Suharto's hold on power seemed secure. Recent events have proved this otherwise. By describing the unfolding events since 1996, tracing the economic and social background, analysing the government's response and evaluating the actors most likely to shape Indonesia's future, this study provides key insights for understanding current and imminent processes of political change in Indonesia. "This particular volume is an extremely useful account of the events surrounding Suharto's fall from office, and his fall from grace." --Journal of Southeast Asian Studies "This book provides a useful, clearly written and thoroughly researched account...It is an essential addition to any teaching library, and indispensable aid in teaching about the period for university undergraduate courses." --Rima

While the first well logs recorded seventy years ago had no provision for data quality control, the development of increasingly sophisticated logging techniques has led to the introduction of a large number of tests to validate acquired data. Log quality can be assured by stringent control of depth, calibrations, signal processing and operating procedures. This work gives a thorough description of these features. The meaningful interpretation of well logs depends on valid input. An understanding of log acquisition, and the performance of rigorous quality checks are the prerequisites for an accurate evaluation of a formation. These elements also enable log users to make decisions based on calculated risks. The book is primarily written for earth science specialists who use log data. It also addresses the needs of logging engineers who seek a better understanding of the log acquisition process. Exercises and their solutions are scattered in the book to complement practical chapters. Contents : I. Premises. 1. Introduction. 2. Evaluation of hydrocarbon volume. 3. Data collection and decision-making. 4. Elements of metrology I: error analysis. 5. Elements of metrology II: volume considerations. 6. Elements of metrology III: other attributes. 7. Mathematical preliminary: propagation of errors. II. Data acquisition. 8. Data acquisition. 9. Sensor and source technology. 10. Effect of measurement duration on precision. 11. Signal processing: filtering. 12. Enhancement of vertical resolution through processing. 13. Tool response. 14. Environmental corrections. 15. The real environment. 16. Density logging. 17. Calibration. 18. Monitoring of tool behavior. 19. Measurement of depth. 20. Directional surveys. III. Data quality control. 21. Data quality plan. 22. Completeness of information. 23. Data management. 24. Log quality checks. 25. Data quality evaluation. 26. Images and nuclear magnetic resonance. 27. Comparison of logged data with other information. 28. Optimum logging and uncertainty management. Bibliography. Index.

An innovator in contemporary thought on economic and political development looks here at decline rather than growth. Albert O. Hirschman makes a basic distinction between alternative ways of reacting to deterioration in business firms and, in general, to dissatisfaction with organizations: one, "exit," is for the member to quit the organization or for the customer to switch to the competing product, and the other, "voice," is for members or customers to agitate and exert influence for change "from within." The efficiency of the competitive mechanism, with its total reliance on exit, is questioned for certain important situations. As exit often undercuts voice while being unable to counteract decline, loyalty is seen in the function of retarding exit and of permitting voice to play its proper role. The interplay of the three concepts turns out to illuminate a wide range of economic, social, and political phenomena. As the author states in the preface, "having found my own unifying way of looking at issues as diverse as competition and the two-party system, divorce and the American character, black power and the failure of 'unhappy' top officials to resign over Vietnam, I decided to let myself go a little."

"An annual review of significant developments and trends in the region. Though the emphasis is on ASEAN countries, developments in the broader Asia-Pacific region are not ignored."--Provided by publisher.

The end of authoritarian rule in 1998 ushered in an exhilarating but unsettled period of democratization in Indonesia. A more open political climate converged with a rapidly changing media landscape, yielding a vibrant and volatile public sphere within which Indonesians grappled with the possibilities and limits of democracy amid entrenched corruption, state violence, and rising forms of intolerance. In *Demanding Images* Karen Strassler theorizes image-events as political processes in which publicly circulating images become the material ground of struggles over the nation's past, present, and future. Considering photographs, posters, contemporary art, graffiti, selfies, memes, and other visual media, she argues that people increasingly engage with politics through acts of making, circulating, manipulating, and scrutinizing images. *Demanding Images* is both a closely observed account of Indonesia's turbulent democratic transition and a globally salient analysis of the work of images in the era of digital media and neoliberal democracy. Strassler reveals politics today to be an unruly enterprise profoundly shaped by the affective and evidentiary force of images.
