Kingdon's landmark work on agenda setting and policy formation is drawn from interview conducted with people in and around the U.S. federal government, and from case studies, government documents, party platforms, press coverage, and public opinion surveys. While other works examine how policy issues are decided, Kingdon's book was the first to consider how issues got to be issues. This enduring work attempts to answer the questions: How do subjects come to

When *Agendas and Instability in American Politics* appeared fifteen years ago, offering a profoundly original account of how policy issues rise and fall on the national agenda, the *Journal of Politics* predicted that it would become a landmark study of public policy

making and American politics. That prediction proved true and, in this long-awaited second edition, Bryan Jones and Frank Baumgartner refine their influential argument and expand it to illuminate the workings of democracies beyond the United States. The authors retain all the substance of their contention that short-term, single-issue analyses cast public policy too narrowly as the result of cozy and dependable arrangements among politicians, interest groups, and the media. Jones and Baumgartner provide a different interpretation by taking the long view of several issues—including nuclear energy, urban affairs, smoking, and auto safety—to demonstrate that bursts of rapid, unpredictable policy change punctuate the patterns of stability more frequently associated with government. Featuring a new introduction and two additional chapters, this updated edition ensures that their findings

Examine the impact of policy entrepreneurs at all stages of policymaking. Public policymaking in the United States is a dynamic, complex, and even circuitous process. That's where policy entrepreneurs come in. These critical catalysts and shapers of change are the engines that drive the whole policy process. Lynn C. Ross, Director of the Master of Policy Management Program (MPM) at Georgetown's McCourt School of Public Policy and an executive branch veteran, lays out what it takes to be a policy entrepreneur. Building from John W. Kingdon's classic streams model (Agendas, Alternatives, and Public Policies), Ross uses prominent case studies to assess the impact of policy entrepreneurs on policy change and shares their strategies.
