Gathered from the APIC Text and AIA Guidelines, AIA ventilation tables and recommendations, along with extensive literature references are included, as well as updated equipment resources. This construction resource is designed for ICPs, safety officers, facility engineers, risk manager, state health departments-facility plan review sections, and healthcare architects. With practical applications on how to carry out an Infection Control Risk Assessment (ICRA) now required by numerous states for construction and renovation and by the JCAHO Environment of Care Standards, the toolkit contains actual slides for an in-service to physical plant staff, references and location of equipment, and tips on reading a blueprint. Unlike other construction books that focus on Indoor Air Quality (IAQ) issues, this toolkit encompasses a broader scope, including specific infectious agents. Also included in the toolkit is a video that demonstrates practical ways to integrate IC and safety issues, plus a disk with great customizable tools.
