The Alfa Romeo 156 is a compact executive car produced by the Italian automobile manufacturer Alfa Romeo. It was introduced at the 1997 Frankfurt Motor Show as the replacement for the Alfa Romeo 155. The 156 received a positive reception and in the following year went on to win the 1998 European Car of the Year award. The 156 saloon was discontinued in Europe late in 2005, while the Q4 Crosswagon continued in production until the end of 2007. Cars were assembled at the Fiat Group factory in Pomi

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.

These important Sports Racing cars of 1967-1977 won the 1975 and 1977 Manufacturers World Championships. The definitive record, this is also the first book to be written about the history and development of Alfa Romeo's fabulous Championship-winning Tipo 33 prototypes. Containing many previously unseen photographs and interviews with key personalities, this is a vital addition to any Alfa enthusiasts collection.

The world of rallying was changed forever on January 1st 1982 with the introduction of the new Group B rules. These virtually gave manufacturers carte blanche to design the fastest car they could for world rally special stages, so long as they built at least 200 identical examples. This is the story of Lancia's mid-engined and supercharged rally. The reader is taken from initial thinking about the car and conception, through development to the full history of its rallying lifetime with the help of the car designer and chief engineer, Ing Sergio Limone. Featuring many of Limone's own photographs during development, and interviews with team members. Illustrated with 250 stunning and rare rally action photos.

Revised and updated to 2007, "Alfa Romeo - Production Cars" was first published in 1996, written by two experts: Stefano d'Amico (President of RIAR, the Alfa Romeo Italian Register) and Maurizio Tabucchi (consultant at both RIAR and ASI, the Italian Vintage Automobile Association).This fascinating story of Alfa Romeo's cars is told model by model by a text that results from precise reconstruction of the facts, enriched with detailed technical specifications (chassis numbering included) and rare archive illustrative material. All of Alfa's recent production can also be found in the book, starting with the 155, the last car in the previous edition, the following 156, 145, 146, 147, 166,159, up to the last "Brera" and "Spider"; A long-awaited new edition that no Alfa Romeo fan should miss. Written in English and Italian.

This book provides a comprehensive overview on several aspects of remote laboratories development and usage, and their potential impact in the teaching and learning processes using selected e-learning experiences.The book is based on the presentations and discussions carried out at «International Meeting on Professional Remote Laboratories», which took place in University of Deusto, Bilbao, in the period of November 16-17, 2006. Apart from chapters based on the presentations, some others have also been included in this book. In this way, we hope to give a broad, well balanced and up-to-date picture of the current status of remote labs and their role within the e-learning paradigm.

With 400 pages, this reference work, published for the first time in this form, offers a comprehensive and informative look at the development of European, American and Japanense car design from 1947 to 2004. Past, present and future design trends are shown with examples of original photos from 370 series of vehicles and concept cars. A biographical overview of leading, international car designers is included. Book jacket.
