A small investment in this book could save you a fortune. With the aid of this book's step-by-step expert guidance, you'll discover all the information you need to know about the Alfa Romeo Giulia GT Coupe you want to buy. Unique point system will help you to place the car's value in relation to condition. This is an important investment-don't buy a car without this book's help.

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

Following in the tracks of the author's well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

With its stylish Bertone coachwork and race-bred 200bhp V8 engine, the Alfa Romeo Montreal is one of the most stunning series production automobiles of the twentieth century. Almost 4000 Montreals were built, and sound cars are readily available today at very affordable prices. This book is a comprehensive pictorial tribute to the Montreal. This is a visual testimonial to a powerful and beautiful coup_ that was born as a futuristic concept and transformed into a dream car that came true. In a portfolio of 575 illustrations, it paints a unique and detailed graphic portrait of all the facets of this elegant and powerful classic GT, revealing why it is immensely enjoyable to drive and turns heads wherever it appears.

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

A historical and practical guide to one of the great British car manufacturers. Armstrong Siddeley was one of the leading brands of British motor cars from the 1920s to the 1960s.

Whether you want to go racing or have maximum street performance, the expert advice in this book will help you to build a powerful and reliable engine first time-without wasting money on incompatible components or modifications that don't work. Covers 1300, 1600, 1750, 1800 and 2000 dohc engines (not Twin Spark). Also offers advice on suspension, brakes, steering and gearing.

Buying a car is an expensive business and mistakes can prove costly. Wouldn't it be great if you could take an expert with you? With the aid of this book's step-by-step guidance from a marque specialist, you can! The unique points system will help to place the car's value in relation to condition while extensive photographs illustrate the problems to look out for.

These important Sports Racing cars of 1967-1977 won the 1975 and 1977 Manufacturers World Championships. The definitive record, this is also the first book to be written about the history and development of Alfa Romeo's fabulous Championship-winning Tipo 33 prototypes. Containing many previously unseen photographs and interviews with key personalities, this is a vital addition to any Alfa enthusiasts collection.

After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class cars with a new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series emerged, followed by the 2600 series in 1962. That they were not hugely successful, although some 18,540 were manufactured between 1957 and 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 colour and black & white photographs, this book introduces the history of the company and its early designs; describes the early Berlina saloon, Spider convertible and Sprint coupe, and their development into the 2600 series; details the evolution of the 1900-based engine into the 6-cylinder 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, colour schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600.
