Use the substitution method to solve for the solution set. 1) 2) Solve equation 2 for y: Substitute into equation 1: If equation 1 was solved for a variable and then substituted into the second equation a similar result would be found. This is because these two equations have No solution.

How to find out when an equation has no solution - Algebra 1
I solve this by first subtracting x from both sides of the equation and so on as Sal did in the videos. However, if I first subtract 1 from both sides of the equation, I get $-x=x$. I divided x into both sides, then I got $-1=1$. That means no solution because $-1=1$ is not true, -1 can never equal 1.

What is an example of a algebra problem with no solution ...

Answered January 16, 2017. Below are some examples of no solution equation. Problem 1: $4x-2+3x = 3x+12+4x-14$.

Solution: $4x-2+3x = 3x+12+4x-14$. Step 1: $4x+2x-2 = 3x+4x+12-14$. Step2: $7x - 2 = 7x - 2$. Step 3: $7x - 7x = -2 + 2$. Step 4: $0 = 0$. So there is no solution of this equation.

It would have been better to have started by subtracting x from both sides, resulting in $0 = 2$, resulting in a false statement telling us that there are no solutions. Answer. There is no solution.

supported by at least one activity, and many are supported by two or more. The rest of the activities address prerequisite skills related to the standards. The number and diversity of the activities in this resource will help teachers to meet the needs of the various abilities and learning styles of their students. The book is designed for easy use. Each section is divided into two parts: a summary of the activities, which includes teaching notes and answers, followed by the reproducibles of the section. The activities stand alone and can be used to supplement instruction and reinforce skills and concepts. Many are self-correcting, a feature that adds interest for students and saves time for teachers. The nine sections of the book are: Section 1: The Language of Algebra (Using Whole Numbers) Section 2: Integers, Variables, and Expressions Section 3: Linear Equations and Inequalities Section 4: Graphing Linear Equations and Inequalities Section 5: Basic Operations with Monomials and Polynomials Section 6: Factors of Monomials and Polynomials Section 7: Complex Numbers Section 8: Polynomial, Exponential, and Logarithmic Functions and Equations Section 9: Potpourri
