Communication Yearbook 14, originally published in 1991 delves into research concerned with: audiences - their effect on the mass media and how the mass media effect them; the quality of mass media performance and public opinion; the study of contemporary media from an organization studies approach; the implications of propoganda; the pressure of public opinion; and media agenda setting, among other issues. Commentaries provide refreshing viewpoints to each chapter, enhancing each chapter with complementary, or sometimes competing perspectives. Once again Anderson has brought together an internationally distinguished team of contributors who have created a forum for discussing cutting-edge topics in the field.

The book gives a fundamental representation of landscape ecology, which proves to be a young, but an interesting and very important trans-disciplinary science for the solution of environmental problems. Both the theoretical basis and practical application of landscape ecology are considered. Great value is attached to describe approaches and experiences from Germany and Central Europe, and to discuss them in an international context. The book is addressed to landscape planners, managers, conservationists and architects, to biologists and geographers, to colleges, universities, authorities, and to the general public being interested in ecological issues. Among the themes are e. g. the roots and the position of landscape ecology, problems of scale and dimension, landscape analysis, diagnosis, potentials, evaluation, change, prognosis, tools like remote sensing and information systems, spatial planning and nature conservation.
