This book explores two combined approaches (strategy and accounting) from a cross-disciplinary perspective in order to improve knowledge of value creation in various contexts. Existing studies on this topic have generally adopted a purely account-based or strategy-oriented approach to address this issue. However, this book draws upon a number of well-defined theoretical and empirical backgrounds and methodologies. Since the 1980s, many changes have occurred and companies have increasingly focused their strategies on value creation. Consequently, new strategic directions have emerged, especially for managerial accounting. Management accounting and alignment with strategy could thus improve performance. This book encourages further thought and reflection on these issues which should be pursued in the future as firms face new challenges associated with the acceleration of digital transformation.

A Passion for Success provides insight into spiritual, business and personal success uncommon in most Western literature. Africa is a laboratory for managerial and societal innovations built out of pragmatic arrangements. Some African companies offer products and services that go beyond the standard practices of their international counterparts, based on original and inventive managerial characteristics. Such success stories outline a new model of management and innovation for companies in the digital era. The African innovations that have emerged over the past ten years are directly linked to a managerial model that perfectly meets the demands of the digital era. These new organizations indicate that good managerial practices and innovation models also come from the Global South and no longer exclusively from the East Coast of the United States. Understanding these dynamics is of great theoretical and practical interest for the many companies struggling to seize the opportunities for growth in Africa.
