Chapters also reflect updates to the 2016 Council for the Accreditation of Counseling and Related Educational Programs (CACREP) standards, and a chapter on each CACREP specialization is included. Students will gain insight into the myriad issues that surround not only the process of counseling and its many populations but also the personal dynamics that have an impact on this process. Instructors will find PowerPoint slides and test banks to aid in conducting their courses, and students can access chapter summaries, exercises, and other tools to supplement their review of the material in the text.

Because Teaching Matters provides teachers with a realistic depiction of today's classrooms while highlighting the enormous impact they have on everyday lives. The second edition presents material around a framework of five professional commitments that allows them to make sense of what it means to be a teacher. A new critical-thinking framework helps them manage the content better and retain more of what they learn. Increased coverage of diversity and technology is integrated throughout the chapters. A new chapter has also been added on the history and philosophy of education. This book will help teachers make decisions and take responsibility for the consequences of those choices.
