This introduction to the theories of personality introduces readers not only to the rich history of psychology but to practical information that helps them understand their own lives and their relationships with other people. Using a theorist-by-theorist approach, the book summarizes the major theories of personality and emphasizes that the best understanding of personality derives from a variety of viewpoints. Thus, theories representing the psychoanalytic, sociocultural, trait, learning, sociological, and existential-humanistic paradigms are offered as different yet equally valid ways of approaching the study of personality. Includes a series of experiential exercises. What Is Personality? Sigmund Freud. Carl Jung. Alfred Adler. Karen Horney. Erik H. Erikson. Gordon Allport. Raymond B. Cattell and Hans J. Eysenck. B. F. Skinner. John Dollard and Neal Miller. Albert Bandura and Walter Mischel. Edward O. Wilson. George Kelly. Carl Rogers. Abraham Maslow. Rollo Reese May. For anyone wanting a comprehensive understanding of personality and individual differences.

This brief, accessible core text provides a comprehensive view of the major developmental perspectives

in a way that should appeal especially to students going on to applied careers in the social and behavioral sciences, education, and the human services and other helping professions. Neither overly detailed nor unnecessarily technical, it is intended as a basic introduction. At the same time, the author does not "talk down" or condescend to the reader. He emphasizes the applied nature of these developmental theories, not only in the text material but also with features such as boxed highlights. The book is organized into five major parts, beginning with an introduction to the primary concepts and important ideas about human development and research and then grouping various theories into four major theoretical perspectives--maturational and biological, psychodynamic, behavioral, and cognitive developmental--before concluding with an integrative chapter that compares the various theories covered.

This 7th Edition helps students unravel the mysteries of human behavior through its highly readable introduction to the ideas of the most significant personality theorists. Engaging biographical sketches begin each chapter, and unique capsule summaries help students review key concepts. Theories come alive through the inclusion of quotations from the theorists' writings and numerous applications such as dream interpretation, psychopathology, and psychotherapy. Significant changes in the 7th edition include an extended discussion of the practical applications of personality theory, with an emphasis on guidelines that can help people increase their self-knowledge, make better decisions, and live more fulfilling lives. Fictionalized but true-to-life examples illustrating the perils of inadequate self-knowledge include college students, parents, terrorists, business executives, and politicians, while other examples show the positive outcomes that can result from a better understanding of one's unconscious. This 7th edition also includes a more extensive discussion of how a lack of self-understanding caused difficulties for such noted theorists as Freud and Erikson, and a new section that explains how behavior can be strongly influenced by the situation as well as by one's personality. Finally, a new interactive web site provides practice test questions and other topics of interest.

Among the theories and ideas the book introduces are mass culture, the Frankfurt School and the culture industry, semiology and structuralism, Marxism, feminism, postmodernism and cultural populism.

Beneath the Mask presents classical theories of human nature while emphasizing the theorist's progression of ideas. The eighth edition continues to discuss the ideas of personality theorists developmentally. This account of personality theory incorporates the personal origins of ideas to highlight the links between the psychology of each theorist and that theorist's own psychology of persons. It also explores how the personal histories, conflicts, and intentions of the theorist entered that thinker's portrait of people.
