Now in its Ninth Edition, Essentials of Human Anatomy & Physiology continues to set the standard for short-course A&P texts with an enhanced media package, an updated art program, and new "active learning" features that help allied health students better visualize and understand the structure and function of the human body. Elaine Marieb's clear and friendly writing style emphasizes the relevance of anatomy and physiology to students' lives and careers. It clarifies concepts, defines key terms, and offers just the right balance of anatomy, physiology, and clinical coverage to make the content complete without being

overwhelming. While many authors merely condense a two-semester text to meet a one-semester need, Elaine Marieb wrote this book specifically for the one-semester course and continues to carefully select a range of material that proves just right for the shorter course. New information on hot topics like DNA fingerprinting, contraception, stem cell research, and obesity draws students into the material, while a flexible topic structure allows instructors to choose a chapter sequence to meet virtually any need. CourseSmart textbooks do not include any media or print supplements that come packaged with the bound book.

For two-semester anatomy & physiology lab courses. A concise, workbook-style approach for a fast-paced A&P lab course This full-color laboratory manual is designed for instructors who teach a two-semester anatomy & physiology lab course, but do not require the full range of laboratory exercises found in Marieb and Smith's best-selling Human Anatomy & Physiology Lab Manual (Cat, Fetal Pig, and Main). Written to complement Marieb and Hoehn's streamlined Anatomy & Physiology, 7th Edition, the manual can be used with any two-semester text. The 27 concise, activity-based lab exercises explore fundamental concepts in anatomy & physiology and build students' observational and laboratory skills. The manual's workbook-style approach incorporates visual summary tables, reviews key information, and engages students with hands-on drawing, labeling, and writing activities that can be completed using handy tear-out review sheets. Each lab includes learning objectives and efficient summaries of key

concepts, as well as a list of materials needed for conducting the lab. The 7th Edition adds dozens of new, full-color illustrations and photos plus new critical thinking and clinical application questions to the Exercise Review Sheets. To improve clarity and readability, the headings, exercise tabs, and tables feature more saturated colors.

For the two-semester A&P laboratory course. Fully engage students in their A&P Lab experience Human Anatomy & Physiology Laboratory Manual: Making Connections distinguishes itself from other A&P lab manuals by focusing on and addressing the most common teaching challenges in the lab--getting students to engage in the lab, to prepare for the lab, and to apply concepts in the lab. Catharine Whiting's active learning approach incorporates a rich variety of hands-on activities and guided questions to get students engaged and asking questions. The 2nd Edition provides new features, such as "What You Need to Know Before You Start this Unit" at the beginning of each Unit and new Pre-Lab Video Coaching Activities to help students learn what they need to review before lab. Developed as the companion to Erin Amerman's Human Anatomy & Physiology, 2nd Edition, Whiting's lab manual reflects the same superb art program and terminology found in the Amerman textbook. Human Anatomy & Physiology Laboratory Manual: Making Connections, 2nd Edition is available in three versions for your students: Main, Cat and Fetal Pig. The Cat and Fetal Pig versions are identical to the Main version except that they include seven additional cat dissection and nine additional fetal pig dissection exercises,

observing, conducting experiments, interacting with groups, and making predictions. Whiting also includes pre-lab assignments to help students better prepare for lab; and post-lab assignments to solidify learning and challenge students to see interrelationships of concepts across topics. Also available with MasteringA&P® This title is also available with MasteringA&P -- an online homework, tutorial, and assessment system proven to help students learn. It helps instructors maximize lab time with customizable, easy-to-assign, automatically graded assessments that motivate students to learn outside of class and to arrive prepared for lab. The powerful gradebook provides unique insight into student and class performance.

A streamlined, workbook-style approach to the A&P lab This full-color laboratory manual is designed for instructors who teach a two-semester anatomy & physiology lab course, but do not require the full range of laboratory exercises found in Marieb's best-selling Human Anatomy & Physiology Lab Manuals (Cat, Fetal Pig, and Man). This lab manual is written to complement Marieb's Anatomy & Physiology, Sixth Edition, but can be used with any two-semester text. Instructors will find 27 concise, activity-based lab exercises that explore fundamental concepts in anatomy & physiology and build students' observational and laboratory skills. Each lab is presented with learning objectives, cogent summaries of key concepts, and meaningful activities. For instructors who want their students to experience how to use a microscope, a complete exercise on its use and care can be found in Appendix A. The fully
