ARCHITECTURAL DRAFTING AND DESIGN, Seventh Edition, is the definitive text for beginning, intermediate, or advanced architectural CAD operators. This full-color, comprehensive edition covers the basics of residential design while exploring numerous types of projects that a designer or architect is likely to complete during the design process. The Seventh Edition is up-to-date with content based on the most recent editions of relevant codes, including the 2015 International Residential Code (IRC), the 2015 International Building Code (IBC), the 2015 International Energy Conservation Code (IECC), and the 2012 International Green Construction Code (IgCC). The text opens with information on architectural styles that have dominated the field over the last four centuries, followed by basic design components related to site and structure. Commercial drafting, basic construction materials, common construction methods, and drawings typically associated with commercial construction are also covered. This bestseller complements informational content with practical, hands-on material, including step-by-step instructions for the design and layout of each type of drawing associated with a complete set of architectural plans--all presented via projects that can be completed using CAD drawing methods. This proven text equips readers with the knowledge and skills needed to complete the drawings that most municipalities require to obtain a building permit for a single-family residence. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Designed for a traditional drafting environment, the Worksheets allow students to get hands-on practice solving drafting problems. Problems from the text are reproduced on drawing sheets (with border and title block included) to reduce layout work.

Architecture: Drafting and Design is a comprehensive, up-to-date program designed to help students learn and communicate basic principles of architectural design and construction systems. With the broad scope of the content and the multitude of resource materials, courses can easily be designed to fit both beginning and more advanced architectural drafting students.

Architectural Graphics focuses on the techniques, methodologies, and graphic tools used in conveying architectural ideas. The book takes a look at equipment and materials, architectural drafting, and architectural drawing conventions. Discussions focus on drawing pencils, technical drawing pens, set squares/templates, circle templates/compasses, line weight/line types, drafting technique, drawing circular elements, floor plan, doors and windows in plan, stairs, wall indications, plan grids, and site boundaries. The manuscript examines rendition of value and context and graphic symbols and lettering. Topics include tonal values, media and techniques, value/texture rendition, material rendition, shades and shadows, people, furniture, graphic representation symbols, and hand lettering. The text explores freehand drawing and architectural presentations, including freehand sketching, graphic diagraming, and sketching equipment. The publication is a valuable reference for architects interested in doing further studies in architectural graphics.

From site, floor, stair, and roof plans, to framing and foundation plans take a step-by-step journey through the architectural and structural drawings required in a complete set of commercial plans. Now in its third edition, Commercial Drafting and Detailing provides comprehensive coverage using clear explanations and professional, practical examples. Updates include an all-new chapter devoted to the development and drawing of architectural and structural details, as well as information that reflects the 2009 International Building Code and current Americans with Disabilities Act (ADA) specifications. With these important revisions, and the same clear concise coverage of building materials and skills that characterized previous editions, this book is an ideal resource. DRAFTING AND DESIGN FOR ARCHITECTURE AND CONSTRUCTION, 9th edition presents architectural drafting and design concepts as practiced by professional architects. With an emphasis on environmental safety, protective measures, expanded coverage of construction design and drawings and chapter objectives, students are able to hone the necessary skills to create a complete set of drawing plans. Abundant appendices provide important reference material, career information, mathematical calculations, standard abbreviations and synonyms. Exciting new material on design principles and procedures along with new entries on smart homes, smart growth, recreational facilities, building information modeling, site planning, ecology, energy conservation, efficiency and sustainability has been added. In addition, Computer-Aided Design (CAD) coverage in an introductory chapter, along with a series of applications throughout, provide examples of how CAD is used to perform specific architectural drafting functions.
