This Daily Practice series helps your students use their skills, so they won't lose them. There are five problems a day, every day, for 36 weeks. The practice activities are set up in a spiraling scope and sequence so that students practice skills at regular intervals. Each week's problems are based on a grade-level appropriate topic so every time a skill shows up, it has a new context, requiring students to dig into their memories, recall what they know, and apply it to a new situation. Correlated to state and national standards, this six book series provides daily math and daily language practice for grades 6, 7, and 8.

This week of practice pages build sixth graders' mathematical fluency. Each problem is tied to a specific mathematical concept. Daily practice through these quick activities will help your young mathematicians. Great formative assessment tool!

"Reviews, goal setting, what to teach, learning styles, how to teach, planning and record keeping, resource addresses"--Cover.
