One element of the Army's transformation strategy is its recapitalization (RECAP) program, which entails rebuilding and selectively upgrading 17 systems. To inform this program's decisionmaking, a two-part analysis was performed to assess the effects of aging on High-Mobility Multipurpose Wheeled Vehicles and to estimate the timing recommended for RECAP and replacement of these vehicles.

challenges in dealing with Iran, the threat of terrorism, and the tide of political instability in the Arabian Peninsula. The presence of some of the world's largest reserves of oil and natural gas, vital shipping lanes, and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition.

July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique

responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's

One of the most remarkable mechanized campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or duskas, the Kurds' version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against

'Daesh', and identifies as far as possible which vehicles took part in major battles, such as Kobane, Manbij and Raqqa. With detailed new artwork depicting the Kurds' range of armour and many previously unpublished photos, this is an original and fascinating look at modern improvised mechanized warfare.

Iraq and the United States face a critical transition through 2011 and beyond. The awkward reality is that an Iraqi-U.S. failure to properly manage the U.S. withdrawal and the creation of effective Iraqi Security Forces (ISF) is as serious a threat to Iraq's future stability and security as any internal or external threat. Realism is a key to future success. The improvement in

ISF capabilities is very real, and Iraqi forces are experiencing growing success in combat. But they are still very much a work in progress, and many Iraqi and U.S. politicians still seem unaware of how much remains to be done. U.S. forces play a critical role in developing the effectiveness of the ISF, providing stability in areas with deep sectarian and ethnic tensions and helping Iraq achieve political accommodation and more effective governance. Through detailed analyses of Iraqi force capabilities, augmented by on-site interviews with U.S. and Iraqi military officials, the authors conclude that the U.S. withdrawal from Iraq needs to be “conditions-based,” not tied to political timelines. Both Iraqi and U.S. leaders need to be careful about exaggerating Iraqi capabilities and the speed with

which the United States can safely withdraw its forces and advisory teams. Conditions for success include realistic and fully resourced plans for the ISF's development; candid and accurate measures of ISF capabilities; and careful assessments of the overall level of security, stability, and political accommodation in Iraq. After years of destructive conflict, Iraq now has the chance, however tenuous, to become a stable and prosperous country. The United States, say the authors, will be judged far more by the way it leaves Iraq and what it leaves behind than by the way it entered and how it fought the counterinsurgency campaign.
