At a time when increased independence requirements for auditors, legal backing for auditing standards, and increased audit documentation requirements have occurred, this book examines key issues in the market for audit services in Australia. It investigates issues including: the understandability of audit and the state of the audit expectations gap; auditors' business acumen and industry expertise; the auditors' use of materiality; whether or not the increasingly prescriptive nature of auditing is creating a distraction from the 'real' audit task and stifling auditors' judgement; whether or not CLERP 9 reforms involving audit partner rotation and restrictions on non-audit service provision are efficient and effective and reactions to the increasing scrutiny of auditors and audit firms by regulators. With its thorough coverage of contemporary issues, this book intersperses the authors' summaries, interpretations and recommendations with the perceptions, expressed in their own words in order to faithfully convey their candid assessments, of users of audit reports, purchasers and suppliers of the audit product, auditing standard setters and regulators of the audit market.

The explosion of data analytics in the auditing profession demands a different kind of auditor. *Auditing: A Practical Approach with Data Analytics* prepares students for the rapidly changing demands of the auditing profession by meeting the data-driven requirements of today's workforce. Because no two audits are alike, this course uses a practical, case-based approach to help students develop professional judgement, think critically about the auditing process, and develop the decision-making skills necessary to perform a real-world audit. To further prepare students for the profession, this course integrates seamless exam review for successful completion of the CPA Exam.

Whittington/Pany's *Principles of Auditing*, is a market leader in the auditing discipline and the only text in this market which uses the balance sheet approach (vs. the cycles approach). Until October 2002, Ray Whittington was a member of the Audit Standards Board and prior to Ray being on the ASB Kurt Pany was on the board. This has had a major impact on this revision of the text as Whittington has been involved in the audit standards creation process. *Principles of Auditing* presents concepts clearly and proactively monitors changes in auditing making the relationship between accounting and auditing understandable. The 15th edition maintains the organization and balance sheet orientation, while adding and enhancing topics of Risk, Assurance Services, Fraud, E-Commerce, and the latest auditing standards to meet the needs of the current marketplace.
