Legal Eagles examines the lives and times of India's top seven lawyers, who fought some of the country's landmark courtroom battles. Tracing their journey from their childhood days to the present, the book highlights the important milestones of their careers, their victories and failures, their influences, and their work ethic and role models, demonstrating that the path to success is paved with determination, grit and challenges. Journalist Indu Bhan gives a ringside view of the most significant case handled by each of these lawyers, including the Vodafone tax case, Coalgate and the 2G spectrum controversy, among others.

Foreign relations law and public international law are two closely related academic fields that tend to speak past each other. As this innovative volume shows, the two are closely interrelated and depend on each other for their mutual construction and identity. A better understanding of this relationship is of vital importance for upholding important constitutional values like democracy, the rule of law and the protection of human rights, while enabling states to engage in meaningful forms of international cooperation. The book takes a close look at the encounters between the two fields and offers perspectives for a constructive engagement between the two. Collectively, the contributions argue that the delimitation between the two fields occurs in a hybrid zone of interaction which requires both bridges and boundaries: bridges for the construction of the relationship between the two fields, and boundaries for preserving key normative expectations of both domestic and international law. Zoroastrianism might be a fast-declining religion in today's world, but what is remarkable is its eternal enigma. It is hard to believe that the hymns of the faith have travelled down to us in accurate form and poetic metre, purely through the memory of generations of priests. Zarathustra, the founder of the faith, belonged to a period of Persian history which antedated the Achaemenid dynasty (from 550 BC to 330 BC). He followed the old Rigvedic religion until he was the first to receive a revelation from Almighty God. The Gathas(the most sacred text of the Zoroastrian faith)were first composed and sung by Prophet Zarathustra. Along with the complete comprehension of the Gathas, consisting 238 verses in the same language as the Rigveda, this book is for anyone who wants to gain a deeper understanding of the purpose of life on earth and what happens to mankind after death. The Gathas are extremely relevant in modern times for the fundamental reason that they are timeless. They do not emanate from Prophet Zarathustra's mind, but are revelations from Almighty God, making them universal in their approach. This book is an attempt to help the reader fully comprehend these and choose the path of leading a righteous life.

Who was Shah Bano and why was her alimony pertinent to India's Secularism? Does the fundamental right to life include the right to livelihood and shelter? Exploring vital themes such as custodial deaths, reservations and environmental jurisprudence, this book contextualizes the judgements, explains key concepts and maps their impacts. Written by one of India's most respected lawyers, Ten Judgements That Changed India is an authoritative yet accessible read for anyone keen to understand India's legal system and the foundations of our democracy.

The austerity crisis and threat to disability rights. New updated edition includes the impact of COVID on Britain's 14 million disabled people. In austerity Britain, disabled people have been recast as worthless scroungers. From social care to the benefits system, politicians and the media alike have made the case that Britain's 12 million disabled people are nothing but a drain on the public purse. In Crippled, journalist and campaigner Frances Ryan exposes the disturbing reality, telling the stories of those most affected by this devastating regime. It is at once both a damning indictment of a safety net so compromised it strangles many of those it catches and a passionate demand for an end to austerity, which hits hardest those most in need.

A book for this moment: Both an assessment of our current political leadership and a vision of those who can bring substantive change. Who are the new progressive leaders emerging to lead the post-Trump return to democracy in America? National political correspondent and award-winning author D.D. Guttenplan's The Next Republic is an extraordinarily intense and wide-ranging account of the recent fall and incipient rise of democracy in America. The Next Republic profiles nine successful activists who are changing the course of American history right now: a new labor activist and author Jane McAlevey | racial justice campaigner (and mayor of Jackson, Mississippi) Chokwe Antar Lumumba | environmental activist (and newly elected chair of the Nebraska Democratic Party) Jane Kleeb | Chicago's first openly gay Latino public official Carlos Ramirez-Rosa | #ALLOFUS co-founder Waleed Shahid | young architects of Bernie Sanders amazing rise, digerati Corbin Trent and Zack Exley, founders of Brand New Congress | and author and anti-corruption crusader Zephyr Teachout. Additionally, the introduction to The Next Republic ties in the election and first year of the Trump presidency to the current rise of populism of the left, and there are three historical chapters that describe key moments in American history that shed light on current events: the Whiskey Rebellion, the Lincoln Republic, and the Roosevelt Republic. Guttenplan understands the magnitude of the problem of democracy, and at the same time the great possibilities for its resurgence. Like a cross between George Packer's The Unwinding and John F. Kennedy's Profiles in Courage, The Next Republic is both unyielding and deeply hopeful, the first book to come out of the Trump ascendancy that stakes a claim for seeing beyond it.
