NOW WITH NEW PROLOGUE ABOUT DEMYSTIFYING CORONAVIRUS NUMBERS, DONALD TRUMP AND WHY STATISTICS MATTER MORE THAN EVER
'The Number Bias combines vivid storytelling with authoritative analysis to deliver a warning about the way numbers can lead us astray - if we let them.'
TIM HARFORD
Even if you don't consider yourself a numbers person, you are a numbers person. The time has come to put numbers in their place. Not high up on a pedestal, or out on the curb, but right where they belong: beside words. It is not an overstatement to say that numbers dictate the way we live our lives. They tell us how we're doing at school, how much we weigh, who might win an election and whether the economy is booming. But numbers aren't as objective as they may seem; behind every number is a story. Yet politicians, businesses and the media often forget this - or use it for their own gain.
Sanne Blauw travels the world to unpick our relationship with numbers and demystify our misguided allegiance, from Florence Nightingale using statistics to petition for better conditions during the Crimean War to the manipulation of numbers by the American tobacco industry and the ambiguous figures peddled during the EU referendum. Taking us from the everyday numbers that govern our health and wellbeing to the statistics used to wield enormous power and influence, The Number Bias counsels us to think more wisely.
'A beautifully accessible exploration of how numbers shape our lives, and the importance of accurately interpreting the statistics we are fed.'
ANGELA SAINI, author of Superior

Pluck has a little red tow truck. He drives it all over town looking for a place to live. Then Dolly the pigeon tells him that the tower of the Pill Building is empty. In the Pill Building, Pluck meets Mr. Penn and Zaza the cockroach. Pluck makes lots more friends and solves all kinds of problems. But the biggest problem is Dove Grove. It used to be a garden with tall trees, but it has been neglected and gone wild. Grown-ups never go there, but the kids from the Pill Building love playing there. But now the Park Superintendent has decided to chop down the trees to make a paved square. Pluck and his friends try to save Dove Grove. But first he has to rescue Longmount from the canal.

This second edition updates a course which has proven to be a perfect fit for classes the world over. Engaging content and a strong focus on grammar and vocabulary combine to make this course a hit with both teachers and students. Popular course features have been refreshed with new content, including the imaginative reading and listening topics, 'Culture in Mind', and 'Everyday English' sections. New for the second edition is a DVD-ROM with the Level 1 Student's Book containing games, extra exercises and videos featuring the photostories' characters as well as a 'Videoke' record-yourself function. There is a full 'Vocabulary bank' at the back of the book which expands upon lexical sets learned in the units.

Reproduction of the original: Treatise On Light by Christiaan Huygens

Complete First Certificate is a new course for the 2008 revised FCE exam. Informed by the Cambridge Learner Corpus and providing a complete FCE exam paper specially prepared for publication by Cambridge ESOL, it is the most authentic exam preparation course available. Complete First Certificate combines the very best in contemporary classroom practice with first-hand knowledge of the challenges students face. There are exercises to help students avoid repeating the typical mistakes that real FCE candidates make, as revealed by the Cambridge Learner Corpus. This topic-based course covers every part of the FCE exam in detail, ensuring that students are fully equipped to tackle each part of every paper. In addition, the accompanying free CD-ROM enables students to focus on their own particular areas of difficulty and work at their own pace. There is a Student's Book with answers and CD-ROM edition so students can study on their own or in class. The Teacher's Book offers plenty of time-saving consolidation and extension material, including photocopiable resources such as tests and activities.

Bear Grylls is one of the world's most famous survivors. Bear Grylls: Two All-Action Adventures combines two of his greatest adventures told in Facing Up and Facing the Frozen Ocean. At the age of twenty-three, Bear Grylls became one of the youngest Britons to reach the summit of Mount Everest. At extreme altitude youth holds no advantage over experience, nevertheless, only two years after breaking his back in a freefall parachuting accident, he overcame severe weather conditions, fatigue and dehydration to stand on top of the world's highest mountain. Facing Up is the story of his adventure, his courage and humour, his friendship and faith. Facing the Frozen Ocean tells of a carefully calculated attempt to complete the first unassisted crossing of the frozen north Atlantic in an open rigid inflatable boat. But this expedition became a terrifying battle against extreme elements and icebergs as large as cathedrals. Starting from the remote north Canadian coastline, Bear Grylls and his crew crossed the infamous Labrador Sea, pushed on through ice-strewn waters to Greenland and then found themselves isolated in a perfect storm 400 miles from Iceland. This is a compelling, vivid and inspirational tale.

Over two decades this art historical tour de force has consistently proved the classic introduction to humanity's artistic heritage. From our paleolithic past to our digitised present, every continent and culture is covered in an articulate and well-balanced discussion. In this Seventh Edition, the text has been revised to embrace developments in archaeology and art historical research, while the renowned contemporary art historian Michael Archer has greatly expanded the discussion of the past twenty years, providing a new perspective on the latest developments. The insight, elegance and fluency that the authors bring to their text are complemented by 1458 superb illustrations, half of which are now in colour. These images, together with the numerous maps and architectural plans, have been chosen to represent the most significant chronological, regional and individual styles of artistic expression.
