Pharmaceutical Importance

Aquaculture sector in Asia-Pacific has grown rapidly during the past four decades and contributed significantly to food security, nutrition, livelihood and overall socioeconomic development in the region. Meanwhile, disease problem has become increasingly challenging in aquaculture. Un-prudent and poorly controlled use of anti-microbial in animal disease control in aquaculture can have significant contribution to AMR risk. Although the control over the use of antimicrobial in aquaculture through some regulatory frameworks has been strengthened over the past decade in the region, it is far from adequate

Download Free Biofloc Workshop Was

and effective in many Asian countries. In order to support the members to effectively address AMR in aquaculture for public health and sustainability of the sector, FAO and Network of Aquaculture Centres in Asia-Pacific (NACA) jointly organized the regional consultation on AMR associated with aquaculture in Asia-Pacific on 4-6 September 2018. This publication documents the conduct of the regional consultation and its outputs, which identified major issues and gaps in tackling AMR issue in aquaculture and recommended desirable interventions and long-term strategy to effectively mitigate AMR risk related to aquaculture in the region. The document also includes the seven country case studies on status of use of

Download Free Biofloc Workshop Was

antimicrobial in aquaculture and the efforts to manage the risks of antimicrobial resistance, which were presented at the regional consultation.

From December 6-10, 2020, USAID organized and IFPRI facilitated five virtual stakeholder consultation workshops on agricultural research and biotechnology, bringing together relevant stakeholders involved in crop and non-crop agriculture from Barishal, Cox's Bazar, Dhaka, Jashore, and Khulna districts in southern Bangladesh. This format aimed to capture the views and perceptions of a range of relevant actors on the status, opportunities and challenges, and

Download Free Biofloc Workshop Was

recommendations for improving agricultural research and biotechnology. This report presents the subjective views of participants who are affected by and have a stake in these discussions, from value chain actors who have had challenges cultivating certain varieties and raising certain breeds due to climate-related challenges to researchers who are developing new varieties and breeds accounting for these ground-level challenges. Although the authors have substantiated parts of this report with primary and secondary data sources, the major thrust of this report is to communicate perspectives as they were framed during the workshops. Although stakeholder responses reflect varying knowledge levels of

Download Free Biofloc Workshop Was

biotechnology among participants, some of which may be convoluted or inaccurate, this report preserves the diversity of stakeholder input as an honest reflection of the opinions received.

This two-volume book on biomass is a reflection of the increase in biomass related research and applications, driven by overall higher interest in sustainable energy and food sources, by increased awareness of potentials and pitfalls of using biomass for energy, by the concerns for food supply and by multitude of potential biomass uses as a source material in organic chemistry, bringing in the concept of bio-refinery. It reflects the trend in broadening of biomass related

Download Free Biofloc Workshop Was

research and an increased focus on second-generation bio-fuels. Its total of 40 chapters spans over diverse areas of biomass research, grouped into 9 themes.

Aquaculture now provides more than 50% of the global supply of fisheries products for direct human consumption. This workshop proceedings discusses critical economic, environmental and social aspects of aquaculture.

The FAO Expert Workshop on Sustainable Use and Management of Artemia Resources in Asia was held in Tianjin University of Science and Technology, Tianjin,

Download Free Biofloc Workshop Was

China, 6–9 November 2016. Over 40 delegates from different countries representing related disciplines of Artemia from research and academic institutions, development organizations, private sectors, ministries and FAO participated in this important event. Based on the workshop presentations and discussion, main conclusions and recommendations of the workshop were prepared during the Discussion and Roundup Session and the proposed actions were agreed. The workshop unanimously agreed that an urgent initiative to establish the Asian Regional Artemia Reference Centre (AR-ARC) be undertaken in Tianjin University of Science and Technology in close collaboration with all the concerned stakeholders

within and outside the country to promote the sustainable use and improved management of the Artemia resources in the region.

This volume provides state-of-the-art information on soil-water interactions in wastewater systems, characterization of wastewater, modes of treatment, safety of wastewater use, water conservation technologies involved in recycling of sewage in fish culture, biogeochemical cycling bacteria and nutrient dynamics, ecosystem resilient driven wastewater reclamation, bioremediation, aquaponics, ecological integrity, culture practices of fish farming, microbial food web phenomena, fish diseases, environmental

Download Free Biofloc Workshop Was

economics of wastewater, environmental risk assessment, environmental law and regulations. Given its breadth of coverage, the book will be useful to researchers, teachers, students, administrators, planners, farmers and entrepreneurs interested in the profitable use of wastewater in the wastes-into-wealth framework of for the benefit of humanity, and in achieving the targets for sanitation and safe wastewater reuse by 2030, specified in the United Nations' Sustainable Development Goals. Concerns are growing about the quality and quantity of fresh water, as severe crises are expected in the near future. Climate change has further worsened the strain on inland water resources, with its major

Download Free Biofloc Workshop Was

impacts on ecosystems and human life. It is most urgent to protect and conserve inland water resources to maintain vital ecosystem functions. Despite the immense nutrient potentials of wastewater in terms of phosphorus, nitrogen and potassium and increasingly high rates of urbanization-based wastewater generation, wastewater has traditionally been overlooked as a resource. This produces a threefold loss – environmental degradation, monetary losses from fertilizers, and water. As a result, municipal wastewater offers a win-win strategy for water conservation and environmental protection, while also turning waste into wealth in the form of fish biomass and allied cash crops. Wastewater-fed aquaculture

Download Free Biofloc Workshop Was

refers to a unique, integrated biosystem in which the wastes generated by the first system are used by the next subsystem. In wastewater-fed aquaculture biosystems, the organic wastes are recycled into fish biomass mediated through a complex microbial/autotrophic/heterotrophic food web mechanism.

This open access book, written by world experts in aquaponics and related technologies, provides the authoritative and comprehensive overview of the key aquaculture and hydroponic and other integrated systems, socio-economic and environmental aspects. Aquaponic systems, which combine aquaculture and
