Blockchain. Bitcoin is a decentralized virtual currency that is not controlled by anyone, and that doesn't require a third-party intervention. It was created by a figure known as Satoshi Nakamoto in 2008.

His identity is still unknown, and he vanished from the online world a few years after introducing the world to the revolutionary technology of

Bitcoin. Bitcoin's value has increased over the years because of its popularity, and many people have made a lot of money from it. No central figure controls Bitcoin, but it's regulated by a peer-to-peer network

Bitcoin is a democratic currency because it can't be influenced or manipulated by a few wealthy people for their gains and interests. Most people have heard about Bitcoin and cryptocurrencies, but there is a lot of mystery that surrounds this terminology. Therefore most people are hesitant about investing in this lucrative currency. Bitcoin has almost become a buzzword in the last few years, thanks to its growing popularity. But the important question is, how does Bitcoin function? Is it
