Bloomberg delivers business and markets news, data, analysis, and video to the world, featuring stories from Businessweek and Bloomberg News

This book examines the problem of low-level tax compliance in Tanzania. It proceeds from the premise that high-level taxpayer compliance is essential to the success of the tax system. The author argues that tax enforcement alone will not of itself lead to high level tax compliance, and posits that there is a strong link between good governance and compliance. He argues further that taxpayers' attitudes towards taxation and towards government in general are formed in a social context, including factors such as perceived fairness of the tax structure, the ability of government to deliver services to its people and the legitimacy of government.

The book explains the common law principles of income tax and the provisions of the Income Tax Act. Incorporates legislative changes effected by the Income Tax Act 113 of 1993 and also analyses and discusses leading cases on income tax to August 1993.
