Environment Security Development And Peace

How is modern civil society created? There are few contemporary studies on this important question and when it is addressed, scholars tend to emphasize the institutional environment that facilitates a modern civil society. However, there is a need for a new perspective on this issue. Contemporary China, where a modern civil society remains in a nascent stage, offers a valuable site to

Online Library Building Civil Society In

seek new answers. Through a comparative analysis of nongovernmental organizations (NGOs) in today ' s China, this study shows the importance of the human factor, notably the NGO leadership, in the establishment of a modern civil society. In particular, in recognition of the social nature of NGOs, this study engages in a comparative examination of Chinese NGO leaders ' state linkage, media connections and international ties in order to better understand how each factor contributes to effective NGOs.

This book examines how civil society actors operate under authoritarian constraints, and examines how this is linked to regime change. This book moves beyond traditional notions of civil society and explains the

Online Library Building Civil Society In

complexity of state-society relations in authoritarian contexts outside the framework of democratization. Rejecting a wholly normative approach, the contributors focus on the whole range of civic activism under authoritarianism, from resistance to support for the political system in place. They explain how activism under authoritarianism is subject to different structures, and demonstrate how active citizens have tried to claw back powers of expression and contestation, but also sought to create a voice for themselves as privileged interlocutors of authoritarian regimes. With a strong empirical focus on a wide range of countries and authoritarian regimes, this book presents cross-country comparisons on Spain, Portugal, Romania, Czechoslovakia,

Online Library Building Civil Society In

Poland, Hungary, Russia, Kyrgyzstan, Tajikistan, Cuba, Chile, Tunisia, Yemen, Jordan, Afghanistan and Burma. Civil Society Activism under Authoritarian Rule will be of interest to students and scholars of international politics, comparative politics, civil society, authoritarianism and regime change.

Development And Peace

The 20th century was heavily marked by an immense ideological dispute between two opposing political and economic systems. The collapse of the Soviet Union brought an end to the Cold War and the profound confrontation between capitalism and communism throughout the globe. Nevertheless, the legacy of this wide system remains to some extent very influential in many of the nation-building processes of the post-Soviet

Online Library Building Civil Society In

countries. Despite the regional divergencies and the distinct sociopolitical developments, some continuities may derive from this common historical background.

Belarus builds the focus of the study of this paper since it belongs to the nations, which have not successfully managed to bring forward a democratization process, failing to guarantee the core requirements for building a strong civil society.

Moreover, the outcome of the 2020 presidential elections, which reinstated Lukaschenko for the 6th consecutive time in front of the Belarusian state, may corroborate the widespread thesis that characterizes Belarus as "Europe's last dictatorship". It is therefore attempted to explore which factors may have hindered the strengthening of civil society, bearing

Online Library Building Civil Society In

in mind that some of its current authoritarian features may have been inherited from the Soviet-era and remain deeply rooted in its political culture.

The transition paradigm has traditionally viewed civil society activism as an essential condition for the establishment of democracy. The democracy promotion strategies of Western policy-makers have, therefore, been based on strengthening civil society in authoritarian settings in order to support the development of social capital -to challenge undemocratic regimes. This book questions the validity of the link between an active associational life and democratization. It examines civil society in the Arab world in order to

Online Library Building Civil Society In

illustrate how authoritarian constraints structure civil society dynamics in the region in ways that hinder transition to democracy. Building on innovative theoretical work and drawing on empirical data from extensive fieldwork in the region, this study demonstrates how the activism of civil society in five different Arab countries strengthens rather than weakens authoritarian practices and rule. Through an analysis of the specific legal and political constraints on associational life, and the impact of these on relations between different civic groups, and between associations and state authorities, the book demonstrates that the claim that civil society plays a positive role in processes of democratic transformation is highly

Online Library Building Civil Society In

questionable. Offering a broad and alternative vision of the state of civil society in the region, this book will be an important contribution to studies on Middle Eastern politics, democratization and civil society activism.

Strengthening civil society may be all the rage in the international donor community, but what does it mean in practice? This seminal work critically examines the political aspects of civil society building and the role of non-governmental development aid agencies during recent democratic transitions in Central America.

This title brings together competing theories of civil society with critical studies of the role of civil society in diverse situations and the way in

Online Library Building Civil Society In

which it has been promoted as the key to democratization. The combination of contemporary theory and practical applications provides valuable reading for students of civil society and contemporary social and political change, and its policy implications for Africa, Asia, Europe and Latin America.

Development And Peace

Demand for practical knowledge and lessons about how the United States and other countries can more effectively promote democracy around the world has never been higher. This timely book by Thomas Carothers, one of the foremost authorities worldwide on democracy building, helps meet that need. Critical Mission draws together a wide-ranging set of Carothers's many seminal, widely cited essays,

Online Library Building Civil Society In

organized around four vital themes: the role of democracy promotion in U.S. foreign policy the core elements of democracy aid the state of democracy in the world the new U.S. push to promote democracy in the Middle East From puncturing myths about promoting civil society to sizing up the prospects for democracy in the Arab world, Carothers is consistently penetrating, incisive, and challenging to policymakers, democracy activists, and scholars alike. The book also includes the only up-to-date, comprehensive bibliography on democracy promotion.

During the 1990s, international democracy promotion efforts led to

Online Library Building Civil Society In

the establishment of numerous regimes that cannot be easily classified as either authoritarian or democratic. They display characteristics of each, in short they are semi-authoritarian regimes. These regimes pose a considerable challenge to U.S. policymakers because the superficial stability of many semi-authoritarian regimes usually masks severe problems that need to be solved lest they lead to a future crisis. Additionally, these regimes call into question some of the ideas about democratic transitions that underpin the democracy promotion strategies of the United States and other Western countries. Despite their growing importance, semi-authoritarian regimes have not received systematic attention. Marina Ottaway examines

Online Library Building Civil Society In

five countries (Egypt, Azerbaijan, Venezuela, Croatia, and Senegal) which highlight the distinctive features of semi-authoritarianism and the special challenge each poses to policymakers. She explains why the dominant approach to democracy promotion isn't effective in these countries and concludes by suggesting alternative policies. Marina Ottaway is senior associate and codirector of the Democracy and Rule of Law Project at the Carnegie Endowment.

¿The church has played a significant role in helping to bring down authoritarian regimes in Eastern Europe, Latin America, and the Philippines. Once the dictator is gone, however, does the church have a role to play in the building or rebuilding

Online Library Building Civil Society In

of a democratic political system?
Father Moreno opens up this question with an interesting discussion on the theoretical level. He then examines two cases, the Dioceses of Malaybalay and Bacolod in the Philippines, developing a useful framework for analysis and arriving at the notion of `engaged citizenship; as the primary contribution of the church to democratization in a postauthoritarian situation.¿ ¿John J. Carroll, S.J., Institute on Church and Social Issues
