Jessica Bruderis is a reporter for the **Oregonian**. Her writing has also appeared in the **New York Times**, the **Washington Post**, and the **New York Observer**. She lives in **Portland, Oregon**.

A practical and irreverent guide to **Burning Man**, its philosophy, why people do this to themselves, and how it matters to the world Over 30 years **Burning Man** has gone from two families on a **San Francisco** beach to a global movement in which hundreds of thousands of people around the world create events on every continent. It has been the subject of fawning media profiles, an exhibit in the **Smithsonian**, and is beloved by tech billionaires and boho counterculturalists alike. But why does it matter? What does it actually have to offer us? The answer, **Caveat Magister** writes, is simple: **Burning Man's** philosophy can help us build better communities in which individuals' freedom to follow their own authentic passions also brings them together in common purpose. **Burning Man** is a prototype, and its philosophy is a how-to manual for better communities, that, instead of rules, offers principles. Featuring iconic and impossible stories from "the playa," interviews with **Burning Man's** founders and staff, and personal recollections of the late **Larry Harvey**—**Burning Man's** founder, "Chief Philosophical Officer," and the author's close friend and colleague—**The Scene That Became Cities** introduces readers to the experience of **Burning Man**, explains why it grew, posits how it could impact fields as diverse as art, economics, and politics, and makes the ideas behind it accessible, actionable, and useful.

Foreword by **Burning Man** founder **Larry Harvey** A stunning visual and narrative homage—featuring more than 100 black & white and color photographs, many never before seen—that captures the wonder and metaphysical power of **Burning Man** past present, and future, and the magic that draws us to it, by the ultimate **Burning Man** insider. Growing up in 1950s **Oregon**, brothers **Stewart** and **Larry Harvey** rebelled against their small-town culture and the conformist norms of **Eisenhower's America**. **Stewart** turned to photography. **Larry**, drawn by the siren call of the burgeoning counter-cultural movement, fled to **San Francisco**, where he met a group of alternative artists like himself. During his frequent visits south, **Stewart**, camera always in hand, photographed the intimate creative worlds of **Larry** and his friends—images that would chronicle the birth of one of the most important cultural, artistic, and social movements of the twentieth century, **Burning Man**. Filled with the rare insights of **Stewart's** decades-long friendships with his brother and the five other founders, as well as the many people who have shaped it, **Playa Fire** is a **Burning Man** story like no other. An artist and writer of striking emotional depth, **Stewart** marries stunning photos reflecting the beauty and grandeur of the desert landscape and the ephemeral, hallucinatory beauty of **Black Rock City** with a compelling narrative journey that captures the landmark festival's spiritual essence. Drawn from his personal archives and taken over thirty years at **Burning Man**—many at "First Camp"—his panoramic photographs are accompanied by never-before-seen memorabilia, including **Larry's** original sketch of the first Man as well as family photos of the young **Harvey** brothers and their band of merry-makers. An exquisite work of art that embodies the radical imagination at the core of this transformative event, **Playa Fire** celebrates both the spectacle and the meditative that is **Burning Man**. It is an enchanting portrait for die-hard "Burners," arts enthusiasts, and the intellectually curious fascinated by this iconoclastic, beloved cultural phenomenon.

"Neil Shister's book skillfully traces the evolution of **Burning Man** and provides rare insights into how this cultural phenomenon is changing the world." --**Michael Mikel**, founding board member of the **Burning Man Project** Written from **Neil Shister's** perspective as a journalist, student of **American** culture, and six-time participant in **Burning Man**, **Radical Ritual** presents the event as vitally, historically important. **Shister** contends that **Burning Man** is a significant player in the avant-garde, forging new social paradigms as liberal democracy unravels. **Burning Man's** contribution to this new order is postmodern, a fusion of sixties humanism with state-of-the-art **Silicon Valley** wizardry. **Shister** is not alone in his opinion. In 2018, the **Smithsonian** dedicated its entire **Renwick Gallery**, located next door to the **White House**, to an exhibition of **Burning Man** art and culture. The festival intertwines conservative and progressive ideas. On one hand it is a celebration of self-reliance, personal accountability, and individual freedom; on the other hand it is based on strong values of inclusion, consensual decision making, and centered, collaborative endeavor. In a wonderful mix of narrative storytelling and reportage, **Radical Ritual** discusses how **Burning Man** has impacted the art world, disaster relief, urban renewal, the utilization of renewable energy, and even the corporate governance of **Google**. The story concludes with the sudden death in **April 2018** of **Larry Harvey**, now renowned as the philosophical epicenter of the movement.

Doherty provides detailed information on the outrageous festival—its inception, history, growth, and players—for the hundreds of thousands who have attended, as well as those who only wish they had.

Offers a photographic record of the annual event held in the **Black Rock Desert** in **Northern Nevada**, from its beginning as a performance art exhibit to its current status as a pop culture destination.
