Now in its 4th edition, Smith/Minton, *Calculus: Early Transcendental Functions* offers students and instructors a mathematically sound text, robust exercise sets and elegant presentation of calculus concepts. When packaged with ALEKS Prep for Calculus, the most effective remediation tool on the market, Smith/Minton offers a complete package to ensure students success in calculus. The new edition has been updated with a reorganization of the exercise sets, making the range of exercises more transparent. Additionally, over 1,000 new classic calculus problems were added to the exercise sets.

Designed for the three-semester engineering calculus course, *CALCULUS: EARLY TRANSCENDENTAL FUNCTIONS, Sixth Edition*, continues to offer instructors and students innovative teaching and learning resources. The Larson team always has two main objectives for text revisions: to develop precise, readable materials for students that clearly define and demonstrate concepts and rules of calculus; and to design comprehensive teaching resources for instructors that employ proven pedagogical techniques and save time. The Larson/Edwards Calculus program offers a solution to address the needs of any calculus course and any level of calculus student. Every edition from the first to the sixth of *CALCULUS: EARLY TRANSCENDENTAL FUNCTIONS* has made the mastery of traditional calculus skills a priority, while embracing the best features of new technology and, when appropriate, calculus reform ideas. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Students who have used Smith/Minton's Calculus say it is easier to read than any other math book they've used. Smith/Minton wrote the book for the students who will use it, in a language that they understand, and with the expectation that their backgrounds may have gaps. Smith/Minton provide exceptional, reality-based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. Features new to the third edition include: \* Many new exercises and examples (for a total of 7,000 exercises and 1000 examples throughout the book) provide a careful balance of routine, intermediate and challenging exercises \* New exploratory exercises in every section that challenge students to make connections to previous introduced material. \* New commentaries ("Beyond Formulas") that encourage students to think mathematically beyond the procedures they learn. \* New counterpoints to the historical notes, "Today in Mathematics," stress the contemporary dynamism of mathematical research and applications, connecting past contributions to the present. \* An enhanced discussion of differential equations and additional applications of vector calculus. \* Exceptional Media Resources: Within MathZone, instructors and students have access to a series of unique Conceptual Videos that help students understand key Calculus concepts that are among the most difficult to comprehend, Interactive Applets that help students master concepts and procedures, algorithmically generated exercises, and "e-Professor" animations.
