A biography of Francis Crozier whose 19th century search for the Northwest Passage lead him on a deadly expedition with Captain Franklin that ended in disaster.

The "masterfully chilling" novel that inspired the hit AMC series (Entertainment Weekly). The men on board the HMS Terror – part of the 1845 Franklin Expedition, the first steam-powered vessels ever to search for the legendary Northwest Passage – are entering a second summer in the Arctic Circle without a thaw, stranded in a nightmarish landscape of encroaching ice and darkness. Endlessly cold, they struggle to survive with poisonous rations, a dwindling coal supply, and ships buckling in the grip of crushing ice. But their real enemy is even more terrifying. There is something out there in the frigid darkness: an unseen predator stalking their ship, a monstrous terror clawing to get in. “The best and most unusual historical novel I have read in years.” –Katherine A. Powers, Boston Globe

Captain Francis Crozier was a major figure in 19th century Arctic and Antarctic exploration who led the doomed Franklin Expedition’s battle to survive against the odds. It is a compelling story which refuses to be laid to rest and recent discovery of his lost ships above the Arctic Circle gives it a new urgency. The ships may hold vital clues to how two navy vessels and 129 men disappeared 170 years ago and why Crozier, in command after Franklin’s early death, left the only written clue to the biggest disaster in Polar history. Drawn from historic records and modern revelations, this is the only comprehensive account of Crozier’s extraordinary life. It is a tale of a great explorer, a lost love affair and an enduring mystery. Crozier’s epic story began comfortably in Banbridge, Co Down and involved six gruelling expeditions on three of the 19th century’s great endeavours – navigating the North West Passage, reaching the North Pole and mapping Antarctica. But it ended in disaster.

The story of the remarkable Tom Crean who ran away to sea aged 15 and played a memorable role in Antarctic exploration. He spent more time in the unexplored Antarctic than Scott or Shackleton, and outlived both. Among the last to see Scott alive, Crean was in the search party that found the frozen body. An unforgettable story of triumph over unparalleled hardship and deprivation.

This inspiring story of Ernest Shackleton, whose men called him 'The Boss', involved four expeditions to Antarctica between 1901 and 1922. His incredible adventures included a breathtaking march to within a few miles of the South Pole and the amazing saga of hardship and survival on the famous Endurance expedition. * Also by Michael Smith: Tom Crean, Ice Man.

To the Arctic by Canoe records the experiences of a remarkable young adventurer, Robert Hood, during the first overland Arctic expedition led by Sir John Franklin. Franklin's expedition was the first to travel the northern coast of North America's Arctic; in two birch-bark canoes the party surveyed no less than 675 miles of Arctic coastline.

James Fitzjames was a hero of the early nineteenth-century Royal Navy. A charismatic man with a wicked sense of humour, he pursued his naval career with wily determination. When he joined the Franklin Expedition at the age of 32 he thought he would make his name. But instead the expedition completely disappeared and he never returned. Its fate is one of history's last great unsolved mysteries, as were the origins and background of James Fitzjames – until now. Fitzjames packed a great deal into his thirty-two years. He had sailed an iron paddle steamer down the River Euphrates and fought with spectacular bravery in wars in Syria and China. But Fitzjames was not what he seemed. He concealed several secrets, including the scandal of his birth, the source of his influence and his plans for after the Franklin Expedition. In this first complete biography of the captain of the HMS Erebus, William Battersby draws extensively on Fitzjames' personal letters and journals – most never published before – as well as official naval records, to strip away 200 years of misinformation and half-truths and enables us to understand for the first time this intriguing man and his significance for the Franklin Expedition.

Capture the spirit of an industrial, social and cultural revolution through this invigorating collection of historical portraits from the dawn of the industrialised world! Though it feels like an era marooned almost irretrievably in the distant past, the 1840s &ndash a decade of blistering social and cultural change – is only two lifetimes removed from the present day. There are, in other words, people alive today who knew and associated with people for whom the Gold Rush and the Great Famine were living memories. Having grown up in an Irish country house built that year, 1847 has long proven the source of inspiration and fascination for historian Turtle Bunbury. And in a bid to once more grasp the spirit of the age, he has over the years assembled an archive of the most remarkable stories from those twelve momentous months. Bristling with all manner of human life and endeavour, from American pioneers and German entrepreneurs to circus charlatans and down-and-out songwriters, 1847 is a collection of his most remarkable discoveries to date and a stirring portrait of a chaotic world surging towards the modern. By turns poignant, outlandish, curious and provocative, this is history at its most invigorating – as panorama, as epic. Praise for The Glorious Madness: 'An absolutely brilliant book.' Patrick Geoghegan, Associate Professor in History at Trinity College, Dublin 'Turtle Bunbury's open-handed, clear-sighted and finely written book comes fresh and, I might almost say, redeemed out of the moil and storm of controversy that surrounded the topic of the war, in a thousand different guises in the decades since its end. Turtle holds out his hand in the present, seeking the lost hands of the past, in darkness, in darkness, but also suddenly in the clear light of kindness – in the upshot acknowledging their imperilled existence with a brilliant flourish, a veritable banner, of wonderful stories.' Sebastian Barry, author of The Secret Scripture 'Turtle continues the wonderful listening and yarn-spinning he has honed in the Vanishing Ireland series, applying it to veterans of the First World War. The stories he recreates are poignant, whimsical and bleakly funny, bringing back into the light the lives of people who found themselves on the wrong side of history after the struggle for Irish independence. This is my kind of micro-history.' John Grenham, The Irish Times Praise for Vanishing Ireland: 'A perfect symbiosis between text and images – both similarity affectionate, respectful, humorous, slightly melancholic but never sentimental or nostalgic. This is invaluable social history.' Cara Magazine 'This is a beautiful and remarkably simple book that will melt the hardest of hearts. Bunbury has a light writing style that lets his interviewees, elderly folk from around the country, tell their stories without interference. It's neither patronising nor overly romantic about the past; just narrating moving tales – The portraits by Fennell are striking, warm and dignified, with a feeling of being invited into people's lives.'The Sunday Times

Driven by a passion for travel and history and a love of ships and the sea, former Monty Python stalwart and beloved television globe-trotter Michael Palin explores the world of HMS Erebus, last seen on an ill-fated voyage to chart the Northwest Passage. Michael Palin brings the fascinating story of the Erebus and its occupants to life, from its construction as a bomb vessel in 1826 through the flagship years of James Clark Ross's Antarctic expedition and finally to Sir John Franklin's quest for the holy grail of navigation—a route through the Northwest Passage, where the ship disappeared into the depths of the sea for more than 150 years. It was rediscovered under the arctic waters in 2014. Palin travels across the world—from Tasmania to the Falkland Islands and the Canadian Arctic—to offer a firsthand account of the terrain and conditions that would have confronted the Erebus and her doomed final crew. Delving into the research, he describes the intertwined careers of the two men who shared the ship's journeys: Ross, the organizational genius who mapped much of the Antarctic coastline and oversaw some of the earliest scientific experiments to be conducted there; and Franklin, who, at the age of sixty and after a checkered career, commanded the ship on its last disastrous venture. Expertly researched and illustrated with maps, photographs, paintings, and engravings, Erebus is an evocative account of two journeys: one successful and forgotten, the other tragic yet unforgettable.

Tom Crean ran away from his Kerry home, aged 15, to join the British navy in 1893. He travelled to the Antarctic with the famous explorers, Scott and Shackleton. He explored the unknown, crossed ice fields and wild oceans and courageously saved friends from death.
