Printed in full color. Software development happens in your head. Not in an editor, IDE, or design tool. You're well educated on how to work with software and hardware, but what about wetware--our own brains? Learning new skills and new technology is critical to your career, and it's all in your head. In this book by Andy Hunt, you'll learn how our brains are wired, and how to take advantage of your brain's architecture. You'll learn new tricks and tips to learn more, faster, and retain more of what you learn. You need a pragmatic approach to thinking and learning. You need to Refactor Your Wetware. Programmers have to learn constantly: not just the stereotypical new technologies, but also the problem domain of the application, the whims of the user community, the quirks of your teammates, the shifting sands of the industry, and the evolving characteristics of the project itself as it is built. We'll journey together through bits of cognitive and neuroscience, learning and behavioral theory. You'll see some surprising aspects of how our brains work, and how you can take advantage of the system to improve your own learning and thinking skills. In this book you'll learn how to: Use the Dreyfus Model of Skill Acquisition to become more expert Leverage the architecture of the brain to strengthen different thinking modes Avoid common "known bugs" in your mind Learn more deliberately and more effectively Manage knowledge more efficiently

Nineteenth-Century Choral Music is an in-depth examination of the rich repertoire of choral music and the cultural phenomenon of choral music making throughout the period. The book is divided into three main sections. The first details the attraction to choral singing and the ways it was linked to different parts of society, and to the role of choral voices in the two principal large-scale genres of the period: the symphony and opera. A second section highlights ten choral-orchestral masterworks that are a central part of the repertoire. The final section presents overview and focus chapters covering composers, repertoire (both small and larger works), and performance life in an historical context from over a dozen regions of the world: Britain and Ireland, the Czech Republic, France, Germany, Hungary, Italy, Latin America, the Philippines, Poland, Russia, Scandinavia and Finland, Spain, and the United States. This diverse collection of essays brings together the work of 25 authors, many of whom have devoted much of their scholarly lives to the composers and music discussed, giving the reader a lively and unique perspective on this significant part of nineteenth-century musical life.

Although the era of European colonialism has long passed, misgivings about the inequality of the encounters between European and non-European languages persist in many parts of the postcolonial world. This unfinished state of affairs, this lingering historical experience of being caught among unequal languages, is the subject of Rey Chow's book. A diverse group of personae, never before assembled in a similar manner, make their appearances in the various chapters: the young mulatto happening upon a photograph about skin color in a popular magazine; the man from Martinique hearing himself named "Negro" in public in France; call center agents in India trained to Americanize their accents while speaking with customers; the Algerian Jewish philosopher reflecting on his relation to the French language; African intellectuals debating the pros and cons of using English for purposes of creative writing; the translator acting by turns as a traitor and as a mourner in the course of cross-cultural exchange; Cantonese-speaking writers of Chinese contemplating the politics of food consumption; radio drama workers straddling the forms of traditional storytelling and mediated sound broadcast. In these riveting scenes of speaking and writing imbricated with race, pigmentation, and class demarcations, Chow suggests, postcolonial languaging becomes, de facto, an order of biopolitics. The native speaker, the fulcrum figure often accorded a transcendent status, is realigned here as the repository of illusory linguistic origins and unities. By inserting British and post-British Hong Kong (the city where she grew up) into the languaging controversies that tend to be pursued in Francophone (and occasionally Anglophone) deliberations, and by sketching the fraught situations faced by those coping with the specifics of using Chinese while negotiating with English, Chow not only redefines the geopolitical boundaries of postcolonial inquiry but also demonstrates how such inquiry must articulate historical experience to the habits, practices, affects, and imaginaries based in sounds and scripts.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

This book proudly features more than 50 unique and truly fabulous stress relieving patterns and designs ! Each page presents a delicately designed, inspiringly intricate artwork on one side, with the other side, thoughtfully left blank. So bade stress goodbye; come, immerse yourself, into the beautiful and colorful world that awaits you, concealed inside.
