Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and

553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

A report from the front lines of the most formative-and least understood-years of children's lives Suddenly they go from striving for A's to barely passing, or obsessing for hours over "boyfriends" they've barely spoken to. Former chatterboxes answer in monosyllables; free-thinkers mimic their peers' clothes, not to mention their opinions. Bodies and psyches morph under the most radical changes since infancy. On the surface, they're "just chillin'." Underneath, they're a stew of anxiety and ardor, conformity and rebellion. They are kids in the middle school years, the age every adult remembers well enough to dread. No one understands them, not parents, not teachers, least of all themselves-no one, that is, until Linda Perlstein spent a year immersed in the lives of suburban Maryland middle-schoolers and emerged with this pathbreaking account. The book traverses the school year, following five representative kids-and including the stories of many more-as they study, party, IM each other, and simply explain what they think and feel. As Perlstein writes about what she saw and heard, she explains what's really going on under the don't-touch-me facade of these critically formative years, in which kids grapple with schoolwork, puberty, romance, identity, and new kinds of relationships with their parents and peers. Not Much Just Chillin' offers a trail map to the baffling no-man's-land between child and teen, the time when children don't want to grow up, and so badly do.

A verse translation of the classic Greek trilogy about the tragic fate of a Theban king and the conflicting loyalties of his proud daughter

Godsmack's founder and front man Sully Erna has been immersed in the world of rock ever since he got his first drum set. Given his achievements, that early start might suggest that his career was a straight shot to the top. The truth is, Erna took so many detours during the years between his first instrument and Godsmack's first contract that, more than once, he nearly forgot his destination. In *The Paths We Choose*, he relates the turbulent story of his life before the platinum albums and packed arenas. Sully's story shows us that whatever hardship we may face, ultimately, our choices determine our destiny. He's made the most of every advantage and obstacle he has faced, and reminds us that we can, too. For Sully, success is not an ultimate destination. Every day brings a new fork in the road, another path to choose
