Circulatory System Worksheet | Teachers Pay Teachers
The circulatory system is made up the heart, blood vessels, and blood.
Circulation, or transport, is a vital function.
Life cannot go on without it.
Blood vessels are found in almost every part of the body.
If laid end to end, your blood vessels would stretch out to about 161,000 km! (About 4 times the distance around the equator!)
Look at Figure B.

Finish your journey through the human body with a ride through the bloodstream to visit all the organs in our body. Our resource breaks down each system of the human body to make it easier to understand as a whole.
Finally, set off by exploring the arteries, veins and capillaries. Examine your own heartbeat as you learn how to take your pulse.
Then, follow the red blood cells as they bring oxygen to the rest of the body.
Discover how the food we eat travels down to our stomach and gets digested. Learn how we get energy from that food, and what happens to waste that our body cannot digest.
Travel through the excretory system to learn about all the different organs that help us get rid of waste.
Build a model of a kidney to see it working in action.
Finally, find out how two cells come together to create life.
Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.

** This is the chapter slice "The Reproductive System" from the full lesson plan "Circulatory, Digestive & Reproductive Systems"**.
How can you tell the difference between an artery and a vein?
Our resource tells you how!
Learn the major organs of four body systems and how they work to keep us alive and healthy.
We begin with blood, blood vessels and the heart.
Next, we follow the path food takes from the mouth to the large intestine, and find out how food is turned into fuel.
Then it `s on to how the liver, lungs and skin all help rid our body of toxins.
We look inside the kidneys and intestines, and finish with how a tiny sperm and egg cell can grow into a baby.
Reading passages, student activities, test prep, and color mini posters all included.
All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.
