Part A- General Intelligence and Reasoning – 50 Questions Part B- General Knowledge and General Awareness -50 Questions Part C- Quantitative Aptitude -50 Questions Part D- English Comprehension - 50 Questions

This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun compounds. Starting out with the Bisetto-Scalise classification, the author carefully examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinomial) compounds. A major merit of the present study lies in the quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.

This report presents a comprehensive threat analysis of the nuclear security situation in India, the measures adopted by the Indian nuclear and security establishments in response, strengths and weaknesses and an overview of the best practices around the world in order to gauge India's nuclear security efforts. The study focuses on potential incidents involving the detonation of a nuclear explosive or use of weaponized nuclear devices, radiological dispersal devices (dirty bomb), and sabotage as well as insider threats to sensitive facilities. While the study focuses largely on the security aspects, the safety of India's nuclear and radiological materials and institutions is also taken into account, considering the existing synergy between the safety and security practices in the nuclear context.

This book has been specially published for the aspirants of 'SSB - ASI (Steno)/Head Constable (Ministerial) Recruitment Exam. The book comprises, along with the Latest Study and Practice Material, a Solved Paper to make you familiar with the exam pattern. Detailed Descriptive Answers have also been provided for Selected Questions for Better Understanding. The book is highly recommended to Sharpen your Problem Solving Skills with thorough practice of numerous questions provided in the book, and prepare yourself to face the exam with Confidence, Successfully.

Research on fathers and fatherhood has blossomed in recent years, focusing, for the most part, on present-day fathering experiences but also beginning to uncover hidden narratives of past fatherhood. This collection aims to add something new to this expanding field by exploring the dynamic relationship between present and past fatherhoods. The popular understanding of fathers in past generations, as being detached and uninvolved in the lives of their children, can be said to play a significant part in the construction of modern fathering identities, with ideas of “ new ” fatherhood being played off against notions of historical fathering practices. However, research has begun to show that these popular myths often misremember the past, judging it by current standards and obscuring the diverse nature of fathering practices in the recent and distant past. A genealogical approach is able to critically examine these intergenerational constructions of fatherhood and more positively illuminate the ways in which experiences of fathering and being fathered are passed on between generations. The contributions to this collection use a genealogical approach (broadly defined) to fathering and fatherhood as a way of defamiliarizing accepted narratives and suggesting new ways of thinking about men and their relationships with their children.

This edited book contains extended research papers from AIMTDR 2014. This includes recent research work in the fields of friction stir welding, sheet forming, joining and forming, modeling and simulation, efficient prediction strategies, micro-manufacturing, sustainable and green manufacturing issues etc. This will prove useful to students, researchers and practitioners in the field of materials forming and manufacturing.
