Intended for both general readers and students, Peter Riesenberg's instructive book surveys Western ideas of citizenship from Greek antiquity to the French Revolution. It is striking to observe the persistence of important civic ideals and institutions over a period of 2,500 years and to learn how those ideals and institutions traveled over space and time, from the ancient Mediterranean to early modern France, England, and America.

literature of early modern Europe. Bodin and Grotius are cited, as well as the statutes of many Italian city-states. Notably, it examines the litigation surrounding citizenship as revealed in the consilia, an enormous body of medieval case law.

A revolutionary approach to the history of political theory. In this groundbreaking work, Ellen Meiksins Wood lays out her innovative approach to the history of political theory and traces the development of the Western tradition from classical antiquity through the late Middle Ages. Her “social history” is a significant departure from other contextual interpretations. Treating canonical thinkers as passionately engaged human beings, Wood examines their ideas not simply in the context of political discourse but as creative responses to the social relations and conflicts of their time and place. From the Ancient Greek polis of Plato and Aristotle, through the Roman Republic of Cicero and the Empire of St. Paul and St. Augustine, to the medieval world of Averroes, Thomas Aquinas and William of Ockham, *Citizens to Lords* offers a rich,

nationality, family, or class but as equally worthy citizens of the world. Martha Nussbaum pursues this “noble but flawed” vision, confronting its inherent tensions over material distribution, differential abilities, and the ideological conflicts inherent to pluralistic societies.

Recent years have seen the development of a substantial literature on cosmopolitan political thought and the idea of world citizenship. In this book Derek Heater offers a concise and accessible survey of this complex debate. He aims both to interpret these concepts and to assist in their comprehension. Central to the organization of the book is Heater's claim that the notion of world citizenship remains weak unless it is able to stand alongside and be comparable to citizenship in its traditional state-embedded sense. Thus, the core

chapters are arranged according to a basic breakdown of the key components of citizenship, covering: identity and morality; law and civil rights; social, economic and environmental citizenship; political citizenship; and competence and education. The author outlines and assesses both supporting and opposing arguments, illustrating his analysis with wide-ranging historical and political references, from the Stoics to the present day. This is an essential text for those studying citizenship and will also be of great interest to students of political theory.
