WITH SECRETS TO HIDE Horse trainer Mike Torres Thompson fabricated new identities for his siblings in order to keep them together after their parents died. Different location, different names, different lives. Once these last two kids are on their feet--and those feet moving out his door, he can pursue his own dream of a ranch for abused horses. Then he meets Grace, and all his carefully-formed plans run away like a mustang. Or a bride. Neither denies their physical attraction, but love? The Prodigal Son is a story about Luke Bennet, a renowned cardiovascular surgeon from Boston, Massachusetts, who as a child, after experiencing the death of his father found solace in science. Due to an unforeseen circumstance, he returns to his hometown of Tremont on a forced "vacation," and faces events that make him question the sterile life he has fashioned: void of all traces of his childhood faith in God and the Catholic Church. While home Luke not only reunites with old friends, he also establishes a new relationship with the exquisitely beautiful stranger named Sophia with whom he becomes intimate. Through her unusual spiritual connection with humanity, she encourages Luke to face his faults, she helps him overcome the childhood trauma that he never healed from, and she guides him to view life in a more balanced way.

A captivating and lucid narrative of America's revolutionary generation, Jefferson's America takes the reader from the earliest rumblings of colonial dissent, through the crises of revolution and nation-making, to the heroic drama of the War of 1812. Risjord deftly weaves together strands of biography and social history with military and political history to depict the rich fabric of the young republic.

For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.
