Pushing 'social' responsibilities on schools is a process that has been underway for a long time. This phenomenon has been studied more in Europe than in North America and the U.K. and has been labelled Pädagogisierung. The editors have chosen to use 'Educationalization' to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems. The term describes these phenomena as a sub-process of the 'modernization' of society, but it also has negative connotations, such as increased dependence, patronization, and pampering. In this book distinguished philosophers and historians of education focus on

Download Free Collaborative Insutional Training Initiative Quiz Answers

'educationalization' to expand its meaning through an engagement with educational theory. Topics discussed are the family and the child, the 'learning society', citizenship education, widening participation in higher education, progressive education, and schooling movements such as No Child Left Behind. 'Smeyers' and Depaepe's book offers great insights into one of the most ambivalent phenomena of today's educational world and especially educational policy. The contributions assembled represent perspectives of some of the most respected scholars in the field. Their manifold critiques of the educationalization of social problems are rather convincing. Our time is definitely ripe for such analysis!' Roland Reichenbach, Center for Educational Studies, University of Basel, Switzerland 'This is a

challenging, critical and analytical treatment of the tendency of contemporary administrations to overburden educational institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic problems. It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers, practitioners and researchers alike.' David Bridges, Von Hügel Institute, St Edmund's College, Cambridge, England This publication is realized by the Research Community (FWO-Vlaanderen / Research Foundation Flanders, Belgium) Philosophy and History of the Discipline of Education: Evaluation and Evolution of the Criteria for Educational Research. A “how-to” approach to navigating the strenuous path from DNP plan to completed project. You completed your DNP proposal and have approval to proceed: What’s next? How do you move from proposal phase to conduct and complete your project? This text is the first to discuss the practical steps to implement and complete the project and will help DNP students to systematically transition from plan to action. Written by an author with extensive experience helping students with their quality improvement projects, the text educates readers on the core components of conducting the clinical scholarly project. With a focus on working effectively with clinical staff, the book addresses IRB approval; ethics; working with human subjects; project planning; collecting, analyzing, and interpreting clinical data; disseminating

This volume offers a comprehensive guide to methods used in the sociocultural, linguistic and historical research of food use. This volume is unique in offering food-related research methods from multiple academic disciplines, and includes methods that bridge disciplines to provide a thorough review of best practices. In each chapter, a case study from the author's own work is to illustrate why the methods were adopted in that particular case along with abundant additional resources to further develop and explore the methods.

The dramatic increase in all things food in popular and academic fields during the last two decades has generated a diverse and dynamic set of approaches for understanding the

many fundamental scientific principles and statistical methods. The book begins with ethical and safety principles, core trial design concepts, the principles and methods of sample size and power calculation, and analysis of covariance and stratified analysis. It then focuses on sequential designs and methods for two-stage Phase II cancer trials to Phase III group sequential trials, covering monitoring safety, futility, and efficacy. The authors also discuss the development of sample size reestimation and adaptive group sequential procedures, phase 2/3 seamless design and trials with predictive biomarkers, exploit multiple testing procedures, and explain the concept of estimand, intercurrent events, and different missing data processes, and describe how to analyze incomplete data by proper multiple
